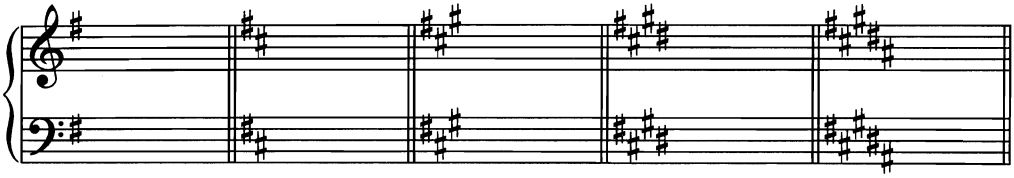
Major Sharp Keys

In Grade 2 we learned about major keys with up to 5 sharps:



G major D major A major E major B major

Well guess what? There are only two more major keys with sharps!

F sharp major

C sharp major

In Grade 2 we learned to remember the order of sharps with a sentence, e.g.

'Fat Cat Goes Driving And Eats Bananas'

Try making up your own sentence here! (Go to www.blitzbooks.com.au for some great 'sentence' ideas!)

F*ather* C*hristmas* G*ave* D*addy* A*n* E*lectric* B*lanket*

Write the following key signatures (watch out for clef changes!):

F sharp major C sharp major E major B major

C sharp major D major A major F sharp major

Minor Sharp Keys

For Grade 3 we have to learn about minor keys with up to **four** sharps. Here they are:

E minor B minor F sharp minor C sharp minor

Write the following key signatures:

C sharp minor B minor E minor F sharp minor

Name these MINOR key signatures:

B minor E minor C♯ minor F sharp minor A minor

And now name these MAJOR key signatures!

C sharp major A major B major F sharp major E major

Name the two keys that share this key signature:

A major and F sharp minor

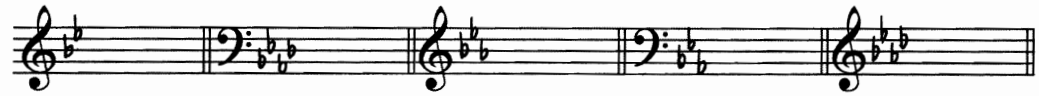
Three New Flat Keys

There are three new **major** keys with flats in Grade 3. (You learned these in Grade 2 as minor keys!)

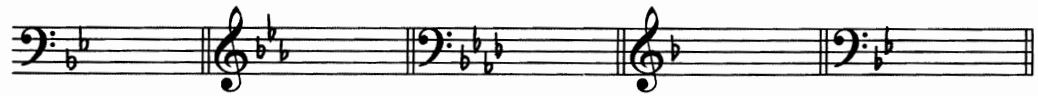
B flat major (relative of G minor) E flat major (relative of C minor) A flat major (relative of F minor)

Remember, we don't need to make up another sentence to remember the order of flats. It's the same as the order of the sharps, but BACKWARDS! (How convenient)

Write these key signatures (watch out for clef changes!):

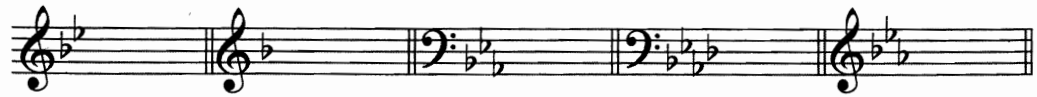


B flat major F minor C minor E flat major A flat major



G minor E flat major A flat major F major B flat major

Name these key signatures:



B flat major D minor E flat major A flat major C minor

DID YOU KNOW... The Blitz Key Signature Table is the perfect aid for memorising key signatures!

Let's Write Scales

Top Tips for Superb Scales

- Semitones in **major** scales fall between scale degrees 3-4 and 7-8
- Semitones in **minor** scales fall between scale degrees 2-3, 5-6 and 7-8
- Avoid marking 6-7 in minor scales - this is not a tone OR a semitone!
- Count up from the **lowest** note of the scale when marking tones or semitones
- Remember to raise the 7th note in minor scales
- Add a double bar line at the end whether the question asks you to or not
- Tick off each scale instruction after you have checked it!

1. Write an F sharp major scale:

- ★ write the key signature
- ★ use semibreves
- ★ write one octave going up

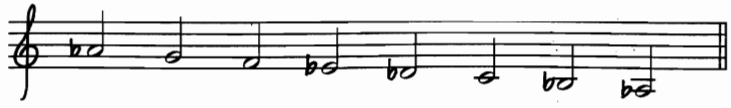
2. Write a B harmonic minor scale:

- ★ use accidentals
- ★ use crotchets
- ★ write one octave going down
- ★ mark the tones

3. Write the major scale with the given key signature:

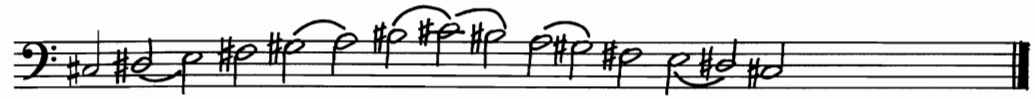
- ★ use minims
- ★ write one octave going up
- ★ mark the semitones

4. Add a clef and any accidentals required to make this an A flat major scale.



5. Write the harmonic minor scale beginning on this note:

- ★ use accidentals
- ★ write one octave going up and back down again
- ★ mark each semitone with a slur



6. Write a C harmonic minor scale:

- ★ write the key signature
- ★ use crotchets
- ★ write two octaves going down
- ★ circle any intervals larger than a tone

7. Using the treble clef, write the major scale with seven sharps:

- ★ write the key signature
- ★ use semibreves
- ★ write two octaves going up
- ★ mark the tones in the lower octave
- ★ complete the scale with a double bar line

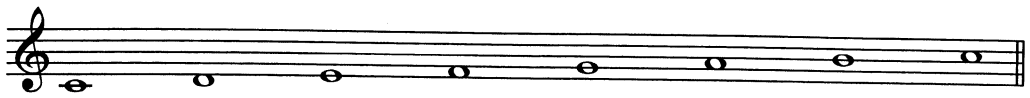
8. Name this scale:

F sharp minor

Go to **www.blitzbooks.com.au** and download the 'Scale Mania' page for more practise on writing scales!

Scale Degree Names

Let's look at C major to revise the technical names of the scale degrees:



Tonic Supertonic Mediant Subdominant Dominant Submediant Leading note Tonic

This part of the exam is exactly the same as Grade 2 (pheu!). Simply write the key signature and the named scale degree. Remember to be careful with the **leading note in minor keys** - it needs to be raised (use a sharp or a natural depending on the key signature).

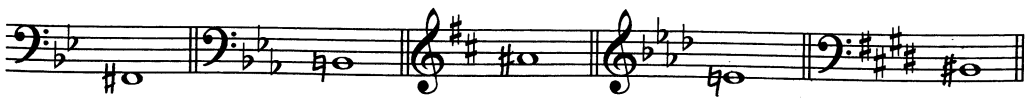
Write the following key signatures and scale degrees:

F sharp minor mediant | C sharp major dominant | E flat major supertonic | B major submediant

B minor leading note | A flat major subdominant | C minor leading note | D minor dominant

F minor supertonic | F sharp major leading note | B flat major tonic | C sharp minor leading note

Add accidentals to make the following leading notes correct (they are all minor keys):



Tiny Test

1. Name these **major** keys and scale degrees (e.g. tonic, mediant etc.) /10

Key: C sharp major | E flat major | D major | A flat major | E major

Degree: Subdominant | mediant | leading note | Supertonic | Submediant

2. Write the scale of B flat major: /6

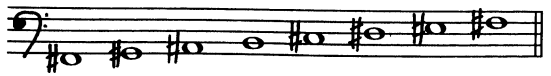
- ★ use accidentals
- ★ use crotchets
- ★ write two octaves going down
- ★ mark the semitones

3. For each of the following, write /8

- ★ the key signature
- ★ the named scale degree

A flat major subdominant | C sharp minor leading note | E flat major submediant | B minor supertonic

4. Add a clef and any accidentals required to make this an F sharp major scale. /6



Total: /30

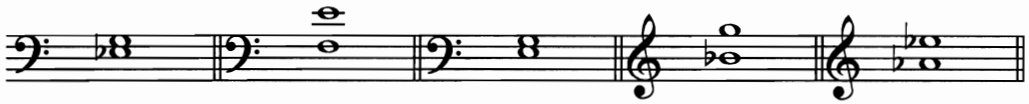
Intervals

Let's do some quick revision of the quality of intervals:

- ★ Unisons, 4ths, 5ths and 8ves are **PERFECT**
- ★ 2nds and 7ths are **MAJOR**
- ★ 3rds and 6ths are either **MAJOR** or **MINOR**

Remember: The **BOTTOM** note of the interval is the tonic.

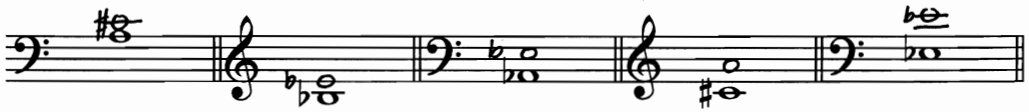
Name these intervals by number and quality. (Remember that the bottom note is the tonic!)



major 3rd | major 7th | minor 3rd | major 6th | perfect 5th

major 7th | minor 3rd | perfect 4th | minor 6th | major 2nd

Write these intervals above the given tonic notes. Don't forget that 'perfect' intervals often need accidentals too!

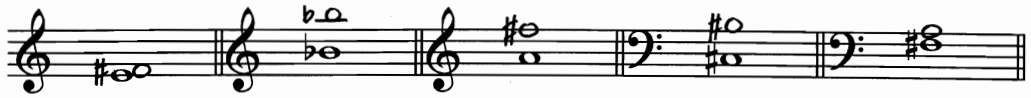


major 3rd | perfect 4th | perfect 5th | minor 6th | perfect 8ve

major 2nd | perfect 5th | perfect 4th | major 6th | major 7th

Let's Practise Intervals

1. Write the following intervals above the given tonic notes.

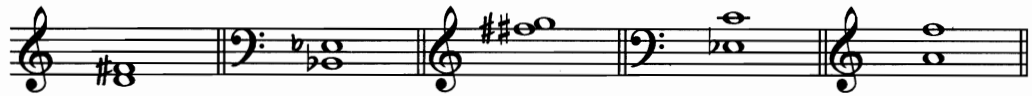


major 2nd | perfect 8ve | major 6th | major 7th | minor 3rd

2. Name the following intervals by number and quality

minor 6th | major 2nd | perfect 5th | major 3rd | perfect unison

3. Add accidentals where necessary to the top notes of these intervals (Warning: some of them may not need any at all!):



major 3rd | perfect 4th | major 2nd | major 6th | minor 6th

4. Write these intervals **above** the given notes using leger lines.

perfect 5th | minor 6th | major 3rd | perfect 4th | major 7th

5. Write a major 2nd above each of these tonic notes.

Inversions of Intervals

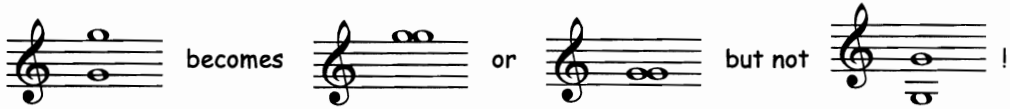
To 'invert' something is to turn it upside down. To write the 'inversion' of an interval, you can either take the bottom note and 'flip' it up an octave (a bit like we do to get first inversion chords), or you can flip the top note down an octave.

For example:

This  becomes this  or this 

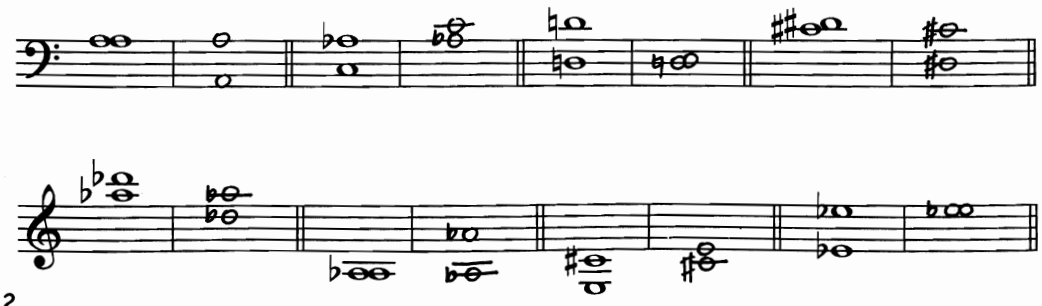
Easy, isn't it? Invert (flip) these intervals whichever way seems easiest. Don't forget to include the accidentals!

You need to be careful when inverting octaves - they become unisons! (And vice versa: unisons become octaves!) For example:



RULE FOR INVERTING INTERVALS: Move **one** of the notes **one** octave only!

Write the inversions of the following intervals.



Naming Inversions

When you invert an interval, the number and quality of the interval changes. To work out the name of an inversion, follow these simple rules:

- ★ MINOR intervals become MAJOR when inverted
- ★ MAJOR intervals become MINOR when inverted
- ★ PERFECT intervals remain PERFECT when inverted
- ★ An interval plus its inversion adds up to 9 (e.g. perfect 5th becomes perfect 4th; 5 + 4 = 9)

Check this out:  3 + 6 = 9! (Woo hoo!)

major 3rd minor 6th

In the exam you are given an interval and asked to write and name the inversion.

ALWAYS WRITE THE NAME OF THE GIVEN INTERVAL FIRST!!

(The exam question doesn't tell you to do this but it makes things a lot easier)

Write and name the inversion of this interval: 

Step 1: Name the given interval: *perfect 4th*

Step 2: Write the inversion.

Step 3: Name the inversion: *perfect 5th* (refer to the rules above)

Write and name the inversions of these intervals. Remember, it's much easier to name the given interval first, then invert it, THEN name the inversion!

HOT TIP: If the given interval is a 2nd or 7th it will be MAJOR, but when inverted it will become MINOR! This is the only time you will find a minor 2nd or minor 7th.

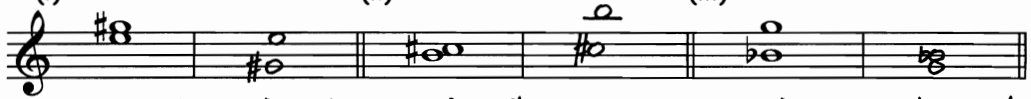
major 2nd minor 7th major 7th minor 2nd major 3rd minor 6th

Incredible Inversions

DID YOU KNOW... In the exam, there are usually no writing lines under the given interval. Don't let this put you off... always write the name of the given interval first!

Write the inversions of the following intervals and then name the inversion.

(i) (ii) (iii)

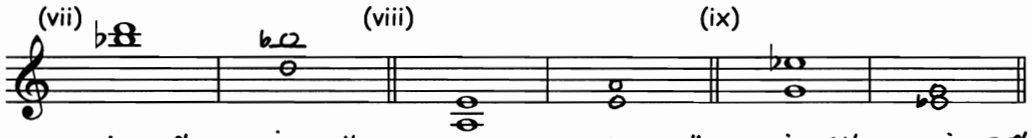


major 3rd minor 6th major 2nd minor 7th major 6th minor 3rd

(iv) (v) (vi)

perfect 4th perfect 5th major 7th minor 2nd perfect 8ve perfect unison

(vii) (viii) (ix)

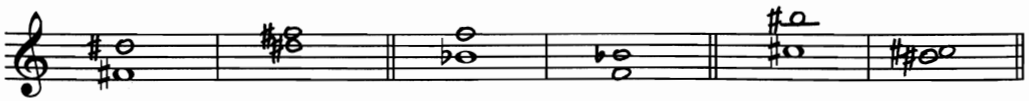


major 3rd minor 6th perfect 5th perfect 4th minor 6th major 3rd

(x) (xi) (xii)

perfect unison perfect 8ve perfect 4th perfect 5th major 7th minor 2nd

Write the following intervals, then invert each and rename.



major 6th minor 3rd perfect 5th perfect 4th major 7th minor 2nd

Timed Test

Time:

Time yourself doing this quiz. Do it as fast as you can, then record your finishing time above. But... guess what? Your teacher will **ADD ON 10 SECONDS** for every mistake you make! It's fun to go fast, but more important to be **accurate**. Start the clock!

1. Name two keys with this key signature:  E flat major and C minor
2. Name this scale:  C sharp minor
3. Mark the semitones in the scale above.
4. Write the mediant note of this major key: 
5. How many semiquavers are there in a dotted crotchet? 6

6. Name this interval:  minor 6th
7. Write a major 7th above this note: 
8. What is the technical name of scale degree no. 6? submediant
9. Name this minor key and scale degree:  G minor, leading note

STOP THE CLOCK - FILL IN YOUR TIME AT THE TOP!

After marking this with your teacher, tick one of the following:

☐ I made no mistakes! I keep my time of _____ !

☐ I made ____ mistakes. My new time is _____

Triads

In Grade 2 you had to write and name the tonic (I), subdominant (IV) and dominant (V) triads in root position. The only difference in Grade 3 is that there are more keys!

Write the key signature and the three primary triads (I, IV and V) of the following keys. Remember to raise the leading note in chord V of minor keys.

E flat major 

C sharp minor 

Each of the following triads is either the tonic (I), subdominant (IV) or dominant (V) of its key. Work out the key and chord number for each.

(TIP: There are two possible answers for each. Remember the triad is either I, IV or V!)

Key: C sharp minor Triad: IV

Key: C minor Triad: V

Key: D major Triad: V

Key: F sharp minor Triad: I

Add accidentals to make the following DOMINANT triads correct:

Write these triads in root position with key signatures:

B major
subdominant (IV)

F sharp major
tonic (I)

C sharp minor
dominant (V)

A flat major
tonic (I)

First Inversion

First inversion triads have the root 'flipped up' one octave.

The root of the chord is on the bottom, so this is 'root position'

Now the root of the chord is on top! This is called 'first inversion'

Label these triads 'R' for root position or number '1' for first inversion.

Rewrite the following triads in first inversion, including the accidentals. Always move the **bottom** note **up** one octave. (Don't be tempted to 'flip' it the other way to avoid leger lines!)

To be able to name the key and number of a triad in first inversion, you must remember that the root is on the **TOP**! (Not the bottom)

Key signature tells you this is D major or B minor

The root is D, so this could be chord I in D major or chord III in B minor

Your answer must be I, IV or V - so this triad is chord I in D major !

Name the key and each first inversion triad as either I, IV or V of that key.

Key: B major Triad: I

Key: F minor Triad: V

Key: D major Triad: IV

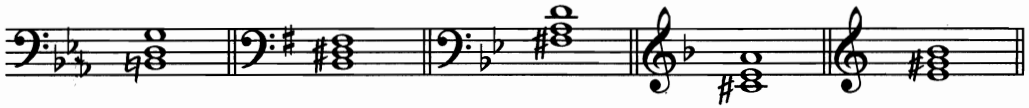
Key: A minor Triad: I

Chord V in First Inversion

In minor keys, chord V needs an accidental for the leading note. In first inversion, the leading note is on the **bottom** of the chord. Let's look at chord V of G minor and C minor:

G minor 
C minor 
DID YOU KNOW... In root position, the leading note is the middle note of chord V, but in first inversion, the leading note is the BOTTOM note of chord V!

The following are all dominant triads in minor keys. Find the leading note in each chord and raise it with the correct accidental:



Write these **dominant** triads with key signatures in **first inversion** (remember to raise the leading note in minor keys only):

D major
dominant (V)

G minor
dominant (V)

A flat major
dominant (V)

F sharp minor
dominant (V)

And now write **dominant** triads (chord V) with key signatures in the position stated:

E flat major
first inversion

C sharp minor
root position

B minor
first inversion

F minor
root position

Terrific Triads

1. Write the following triads using key signatures

A flat major
subdominant (IV)
first inversion

C sharp minor
dominant (V)
first inversion

F sharp major
dominant (V)
root position

REMEMBER: You only have to raise the leading note in chord V of MINOR keys!

2. When writing triads, we must include accidentals in: (circle correct answer)

   A. Chord V in all keys
   (B) Chord V in minor keys only
   C. Chords I, IV and V in minor keys

3. Name these triads as I, IV or V of their key, and state whether they are in root position or first inversion.

Key A flat major Triad I Position Root

Key B flat major Triad I Position 1st inversion

Key D major Triad IV Position 1st inversion

Key D minor Triad V Position Root

Key F sharp minor Triad V Position 1st inversion

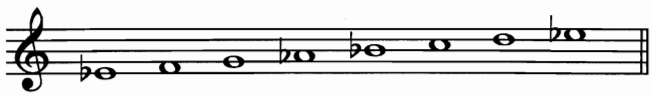
Key E minor Triad IV Position Root

Key E flat major Triad I Position 1st inversion

Key E major Triad V Position 1st inversion

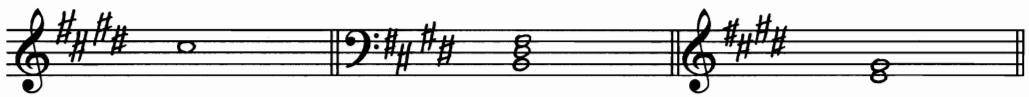
Revision of Stuff

1. Name this scale. /1



E flat major

2. Write the key signature of E major in each of the bars below (watch out for changes of clef). Then write the following: /6



submediant note | dominant triad | major 3rd above E

3. Add a clef and accidentals to make this a C sharp harmonic minor scale. /5

4. In the scale above, mark with a slur any intervals larger than a tone. /2

5. Write the key signature of C minor, then write the three primary triads in root position. Write the name and number of each chord (e.g. Tonic, I). /6

Tonic (I) | Subdominant (IV) | Dominant (V)

6. Name each of these MAJOR keys: /5

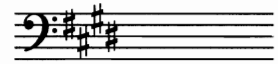
B flat major | F major | E flat major | F sharp major | A major

7. Go back to question 6 and write the mediant note for each key signature. /5

8. Write the scale of A flat major: /8

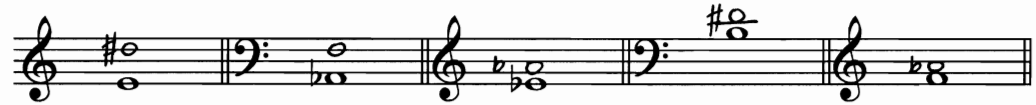
- ★ use accidentals
- ★ use minims
- ★ write two octaves going up
- ★ mark each semitone with a slur
- ★ complete the scale with a double bar line

9. Name two keys that share this key signature. /2



1. E major 2. C sharp minor

10. Write these intervals above the given tonic notes. /5



major 7th | major 6th | perfect 4th | major 3rd | minor 3rd

11. What name would have appeared on Darth Vader's birth certificate? /1
(this is not likely to be tested in the exam) Anikin Skywalker

12. Name the key of each of these **tonic** triads (the accidentals are your clues!): /4

G minor | A♭ major

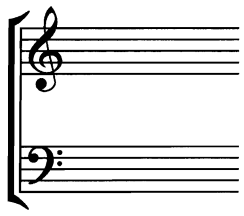
Total: /50

Choir Music: Four-Part Vocal Style

In a choir there are 4 types of voices:

The highest voice is called SOPRANO
The second highest voice is called ALTO
} ← These are usually female voices

The second lowest voice is called TENOR
The lowest voice is called BASS
} ← These are usually male voices



Soprano and Alto voices are always written in the treble clef

Tenor and Bass voices are always written in the bass clef

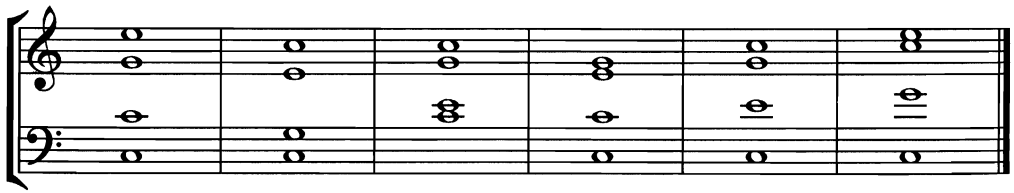
Four-part vocal style is also known as SATB style - for Soprano, Alto, Tenor and Bass.

When writing music in four-part vocal style (SATB), each voice is given a different note of a chord to sing. Now here's a thought - there are only 3 notes in a chord, but there are 4 voices. Where does the 4th note come from? The answer is:

WE DOUBLE THE ROOT OF THE CHORD!!!

P.S. The root is the note the chord is built on.

For example, the notes in a C major chord are C, E and G. We need an extra note, so we'll double the root; now we have C, E, G and C. Here are six different versions in four-part vocal style:



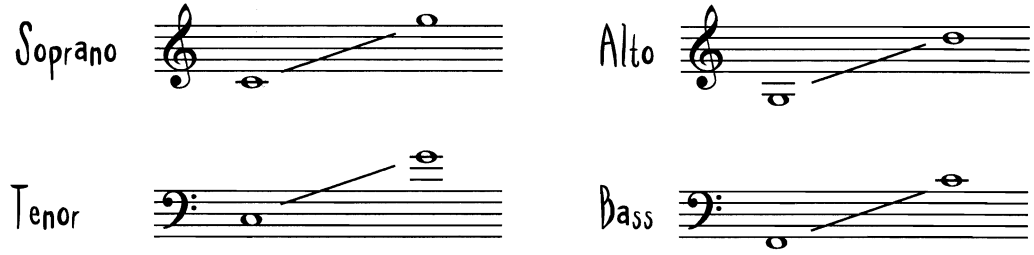
Which note does the bass sing every time? C This is a very important rule:

THE BASS ALWAYS SINGS THE ROOT!

The other notes are allocated to the other voices in any order.

Vocal Ranges and Spacing

Before you start to write your own chords in four-part vocal style, it is important to know how high and low each voice can sing. Here are the ranges of each voice:



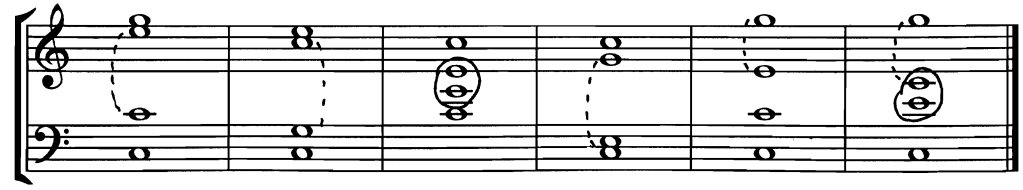
Sing some melodies with your teacher. Which 'voice' are you? _____

DID YOU KNOW... Each voice has a range of 12 notes, or an octave plus a fifth. If you memorise the lowest note for each voice, it's easy to work out the highest note!

When you write chords for choirs, it's very important to know how to space the notes. The rules for spacing are:

- ★ Soprano must not be more than one octave away from Alto
- ★ Alto must not be more than one octave away from Tenor
  (this can be tricky to spot since these two voices are written on different clefs)
- ★ Tenor and Bass can be as far apart as they like!
  (But they must stay within vocal range!)
- ★ Tenor and Alto may not overlap one another at any time

Check out these chords for choirs. Each one has a mistake in spacing or overlapping! Can you spot them?



Chords for Choirs

Let's write chord I of D major for four voices. We'll use semibreves, it's easiest.

What are the notes in chord I of D major? D F and A

Which note will be doubled? D (Hint: always double the root).

Now write these letter names above the bar so you can cross the notes off as you use them.

Which note will the bass voice sing? D (Hint: bass always sings the root)

Now you can write this chord in four-part vocal style!

Checklist:

- ☑ Bass is singing the root of the chord
- ☑ Soprano and alto are no more than one octave apart
- ☑ Alto and tenor are no more than one octave apart
- ☑ All voices are within their vocal range
- ☑ Tenor and alto are not overlapping

Good work! Now there's just one more thing you need to know - the rules for stems. Simply remember this: UP-DOWN-UP-DOWN.

The stems go in opposite directions in each stave. This way they don't crash into each other!

Now let's write chord IV of G major, this time in MINIMS.

What are the notes in chord IV of G major? C E and G

Which note will be doubled? C (Hint: always double the root).

Write these letter names above the bar, then write the chord.

Add stems to the notes - soprano first (UP), then alto (DOWN), then tenor (UP), then bass (DOWN). Great work!

Then use the list above to check your work.

HOT TIP: One way to ensure good spacing of your chords is to keep the tenor part quite high. This way it's easy to keep the alto part within an octave of the tenor!

Now you can write your own combinations of the following chords. Write the key signature, and add stems to make all the notes minims.

A major
Chord IV

A flat major
Chord I

B minor
Chord V (Be careful!)

C sharp major
Chord V

A minor
Chord V

E flat major
Chord I

Did you know, it's actually possible to have tenor and bass singing the same note! To show this in semibreves, write the notes side by side, like the 'unison' interval:

To show two parts on the same note in minims or crotchets, simply put two stems on the same note, one up and one down, like this:

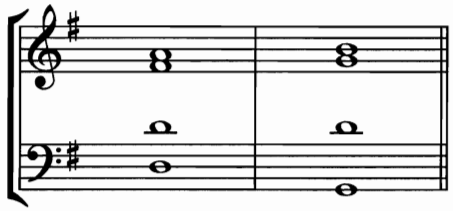
Go to **www.blitzbooks.com.au** and download some free 'cadence style' manuscript paper. Write chords I, IV and V in F, G and C major AND minor!

The Perfect Cadence

Play through some pieces on your instrument. You will notice that most of the time, the last two notes or bars are based on chords V and I. This is called a 'perfect cadence'.

> A perfect cadence is made up of chords V–I. Chord V always goes first!

Here is a perfect cadence in G major written in four-part vocal style:



Things to Notice

Which voice is singing the leading note in chord V? Alto

Which voice is singing the tonic in chord I? Alto (apart from the Bass)

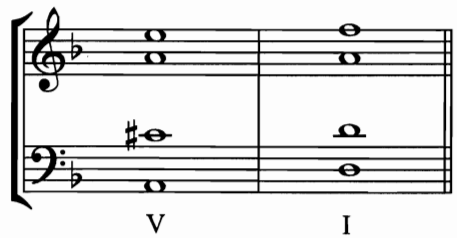
Which voice is singing the same notes in both bars/chords? Tenor

Which voice is singing the root of the chord in both bars/chords? Bass

This D minor cadence is voiced differently.

Which voice is singing 'leading note to tonic'? Tenor Which voice has the 'note in common'? Alto

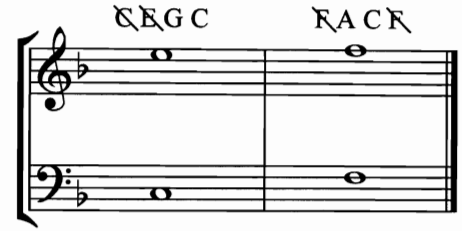
Which voice is singing the root in both chords? Bass



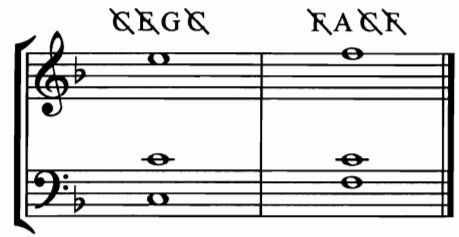
> HOT TIP: Perfect cadences in minor keys need special attention. You'll need to find the leading note (which is always in chord V) and raise it with a sharp or a natural sign!

So, perfect cadences should always be structured in a certain way. Here's an example of how to complete one in F major:

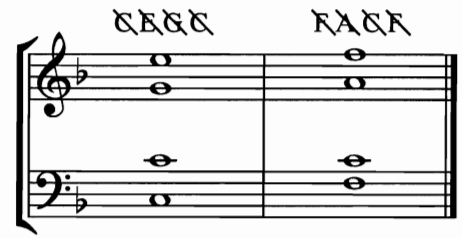
1. The Bass voice sings the root notes - always write these in first



2. One voice sings the 'leading note to tonic' - sounds good in any voice



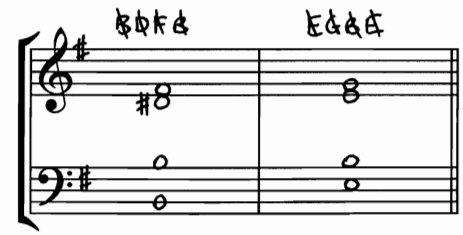
3. One voice sings the 'note in common' - sounds nicest in alto or tenor



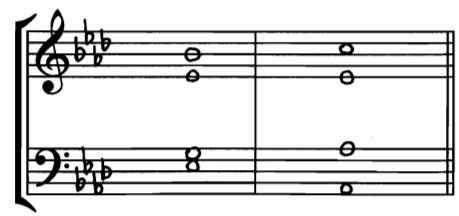
4. The remaining voice sings whichever notes are left!

Let's write a perfect cadence in E minor on the staff below. Write the key signature, and write the letter names above each bar so that you can cross them off as you go.

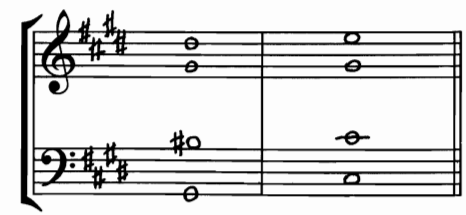
1. Bass sings the root
2. Leading note to tonic (raise the leading note)
3. Note in common
4. Whatever's left!



Great work! Now write perfect cadences in these keys with key signatures:



A flat major



C sharp minor (be careful!)

Perfecting Perfect Cadences

1. Write down the four 'steps' to a perfect cadence:

1. Bass sings the root
2. Leading note to tonic
3. Note in common
4. Whatever's left

HERE'S A THOUGHT... if you always follow these steps, you will never get 'consecutive 5ths' or 'consecutive 8ves' in your cadences. Go to www.blitzbooks.com.au for heaps more information on this!

1. Write perfect cadences in these keys using minims. Write the key signature.

C sharp major

G minor

2. Complete these perfect cadences and name the key of each.

Key: C minor

Key: F sharp major

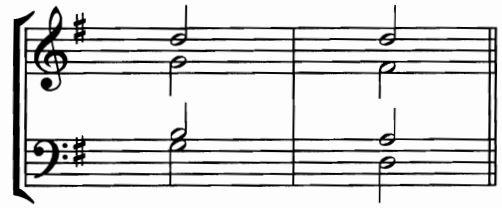
Go to **www.blitzbooks.com.au** and download some FREE 'cadence style' manuscript paper. Now write perfect cadences in the folowing keys: E maj/min, F maj/min, C maj/min and F sharp maj/min. (That's 8 perfect cadences in total – have fun!)

The Imperfect Cadence

An imperfect cadence consists of any chord leading to chord V. Imperfect cadences sound very 'unfinished' and they are usually found halfway through a phrase or piece.

An imperfect cadence always ends on chord V.

Here are some imperfect cadences. Play them or get someone to play them for you:



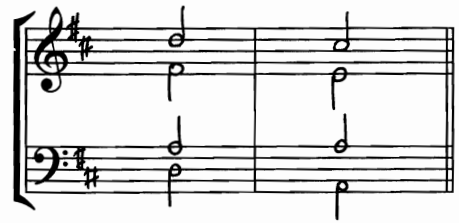
G major (I - V)

B minor (I - V)

Writing imperfect cadences with chords I - V is easy: it's just like writing perfect cadences, but the chords are switched around!

Step 1: Bass sings the root of the chords
Step 2: **Tonic** to **leading note** (reverse of perfect cadences)
Step 3: Note in common
Step 4: Whatever's left!

Write imperfect cadences in the following keys (hint: raise the leading note in chord V of minor keys!):



D major (I-V)

F sharp minor (I-V)

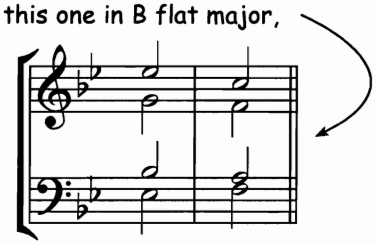
Go to **www.blitzbooks.com.au** and download some FREE 'cadence style' manuscript. Now write imperfect cadences with chords I-V in the following keys: E maj/min, B maj/min, G maj/min and C sharp maj/min. (Have fun again!)

More Imperfect Cadences

An imperfect cadence always ends on chord V. But the first chord does not have to be chord I, it could also be chord IV!

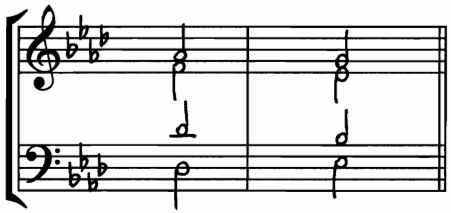
An imperfect cadence may consist of chords I–V or chords IV–V.

To write an imperfect cadence with chords IV - V, like this one in B flat major, just remember these two steps:



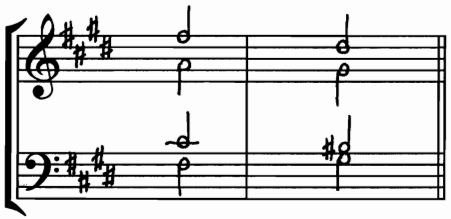
1. The bass note (the root) steps UP
2. All other voices move DOWN
   (extremely important as this avoids consecutive 5ths and 8ves)

Write imperfect cadences using chords IV - V in the following keys. Add stems to make the notes into minims.

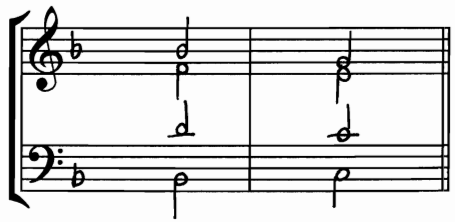


A flat major

B minor



C sharp minor



F major

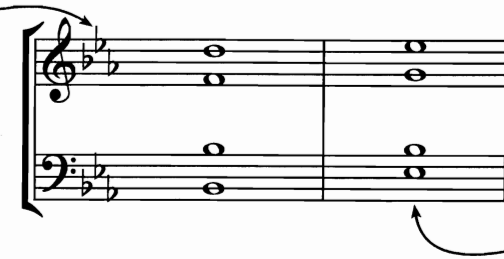
Go to **www.blitzbooks.com.au** and download some more FREE 'cadence style' manuscript paper. Then write perfect cadences (V-I) and two types of imperfect cadences (I-V and IV-V) in F maj/min, D maj/min **and** A maj/min! (That's 18 different cadences – wow!)

Perfect or Imperfect?

In the exam you must decide whether a certain cadence is perfect or imperfect. The easiest way is to look at the **bass note** of the **LAST CHORD**.

Quick revision: Perfect cadences end on chord I
Imperfect cadences end on chord V

This key signature could be E flat major or C minor

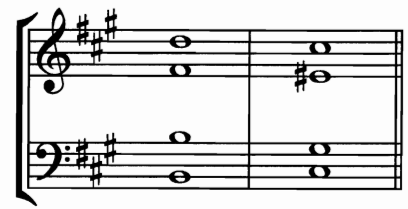


This bass note is either no.1 of E flat major or no.3 of C minor

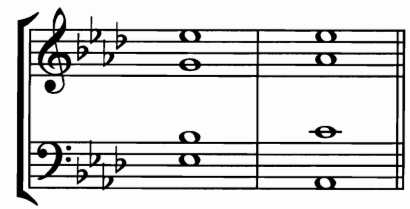
We know the last chord is either I or V... so it must be chord I of E flat major. Therefore it is a *perfect* cadence. Easy!

HOT TIP: A 'short cut' way to identify the key is to look for accidentals. If the leading note is raised, you know it must be a minor key!

Identify the following keys and name the cadences as perfect or imperfect.



Key: F sharp minor
Cadence: Imperfect



Key: A flat major
Cadence: Imperfect

Key: C minor
Cadence: Perfect

Key: B minor
Cadence: Imperfect

Let's Practise Cadences

HOT TIP I: Sometimes the question does not tell you which rhythmic value to use when writing cadences. In this case it's usually easiest to write in semibreves – no stems to worry about!

HOT TIP II: Sometimes the question does not tell you whether to write I–V or IV–V for an imperfect cadence. You can choose!

1. Write these cadences with key signatures. Use minims.

B flat major
perfect cadence

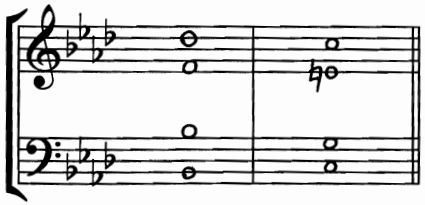
C minor
imperfect cadence

2. Complete the following cadences and name the key of each.

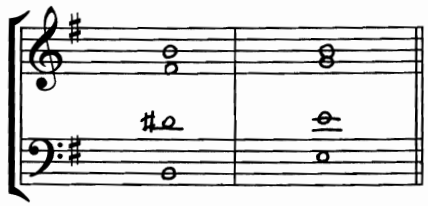
imperfect cadence
Key: A minor

perfect cadence
Key: G minor

3. Write the following cadences in the key indicated by these **minor** key signatures:



imperfect cadence (IV-V)



perfect cadence

Revision of Lots of Stuff

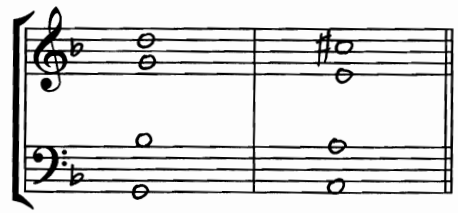
1. Write the following triads with key signatures. /12

G minor	C minor	F sharp major	E flat major
subdominant (IV)	dominant (V)	subdominant (IV)	tonic (I)
root position	first inversion	root position	first inversion

2. For each of the following, name the key, triad (either I, IV or V) and position: /12

Key A minor	Key C sharp minor	Key B flat major	Key F minor
Triad IV	Triad I	Triad V	Triad IV
Position Root	Position 1st inversion	Position Root	Position 1st inversion

3. Write these cadences with key signatures. /10



D minor
imperfect cadence

E major
perfect cadence

4. Write the inversions of these intervals and name the inversion: /6

perfect 5th | perfect 4th | minor 6th | major 3rd | major 3rd | minor 6th

Total: /40

Timed Test II

Time:

Once again, time yourself doing this quiz and record your finishing time above. Remember, your teacher will **ADD ON 10 SECONDS** for every mistake you make! It's fun to go fast, but more important to be **accurate**. Start the clock!

1. Name this interval:  major 7th
2. Write the inversion of the above interval and name it.  minor 2nd
3. Name two keys that share this key signature:  D major and B minor
4. How many tones are there in an harmonic minor scale? 3
5. Write chord IV of this major key in first inversion: 6. An interval plus its inversion always adds up to 9 .
7. Between which two scale degrees is the interval of a 'tone-and-a-half'? 6-7
8. Add the missing accidental to this dominant chord of C minor: 
9. Name the chords in two types of imperfect cadences: I - V and IV - V.

STOP THE CLOCK - FILL IN YOUR TIME AT THE TOP!

After marking this with your teacher, tick one of the following:

☐ I made no mistakes! I keep my time of _____ !

☐ I made ____ mistakes. My new time is _____

Tails, Beams and Dots

Quick Revision of Grade 2 Stuff:

Quaver notes and rests have one tail (♪) or one hook (𝄾) and they are worth **half** a crotchet beat.

Semiquaver notes and rests have two tails (𝅘𝅥𝅯) or two hooks (𝄿) and are worth one **quarter** of a crotchet beat.

Quavers are grouped by one beam (♫) - they are worth **half** a crotchet beat each.

Semiquavers are grouped by two beams (♬) - they are worth one **quarter** each.

New Grade 3 Stuff:

Sometimes we get a mixture of beams! For instance: 

How many notes in have one beam? 1 How many notes have two beams? 2

So this needs some fancy maths: $\frac{1}{2} + \frac{1}{4} + \frac{1}{4} =$ 1

How about:  ? What is the value in crotchet beats? 1

In Grade 3 we also get more complicated dotted rhythms. A dot makes a note or rest longer. The dot equals half the value of the note or rest.

𝅗𝅥. = 6 (4 + 2) ♩. = 3/4 ($\frac{1}{2}+\frac{1}{4}$) 𝄽. = 3/4 ($\frac{1}{2}+\frac{1}{4}$)

Dotted quavers are ALWAYS followed by a semiquaver, e.g. ♪. 𝅘𝅥𝅯 or ♪. 𝄿 or ♪.

HOT TIP:  ♪. has exactly the same value as ♩ – it's worth one crotchet beat!

Add the correct time signature to these rhythms:

Introducing $\frac{2}{2}$ and $\frac{3}{2}$

In $\frac{2}{2}$ and $\frac{3}{2}$ we have a '2' for the bottom number. This means that the beats are MINIM beats. The minim beats are not dotted, so these are SIMPLE time signatures.

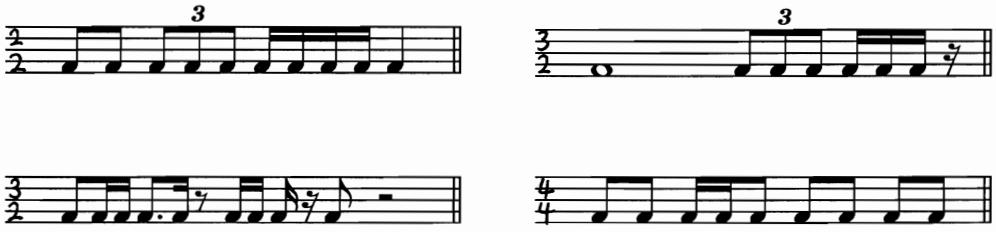
$\frac{2}{2}$ means **two minim beats per bar, simple duple.** $\frac{2}{2}$ can also be written as ¢. This is known as 'Cut Common time', or 'alla breve'.

$\frac{3}{2}$ means **three minim beats per bar, simple triple.**

In $\frac{2}{2}$ (¢) and $\frac{3}{2}$, quavers are grouped in fours, to show the minim beats, like this:

HOT TIP: $\frac{2}{2}$ and $\frac{4}{4}$ look very similar as they both contain 4 crotchet beats. The grouping of quavers can be your big clue when trying to tell the difference between them!

Add the correct time signatures to these bars. (Warning: Do not write $\frac{6}{4}$ as your answer! You must write $\frac{3}{2}$)



Add a time signature and bar lines to these FOUR-BAR melodies (watch out for an anacrusis!).

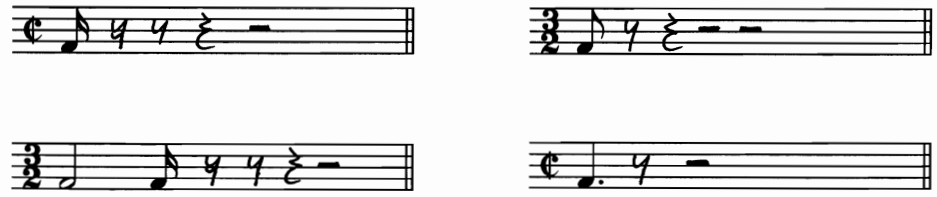
Completing the bar can be tricky in $\frac{2}{2}$ and $\frac{3}{2}$. Let's complete this bar with rests:

1. Always follow 𝅗𝅥 with 𝄽, no matter what the time signature!
2. Add 𝄽 to make it up to a crotchet beat
3. Next add 𝄼 to complete the first minim beat
4. Fill the rest of the bar with two minim rests! (We can't use 𝄻 because that would be grouping two weak beats together)

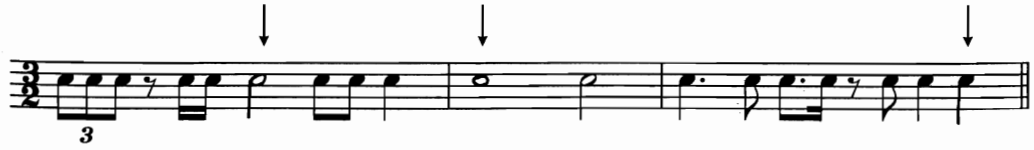
Handy Hints for completing the bar in $\frac{2}{2}$ and $\frac{3}{2}$:

- ★ FIRST make semiquaver beats up to quaver beats, e.g. follow 𝅘𝅥𝅯 with 𝄾
- ★ THEN make quaver beats up to crotchet beats, e.g. follow 𝅘𝅥𝅮 with 𝄽
- ★ THEN make crotchet beats up to minim beats, e.g. follow 𝅗𝅥 with 𝄼
- ★ In $\frac{3}{2}$ you may need two minim rests in a row to complete the bar. Don't be tempted to use 𝄻 instead!

Complete the following bars using rests.



At each place marked with an arrow, write one **note** to complete the bar.



$\frac{9}{8}$ is just like $\frac{6}{8}$

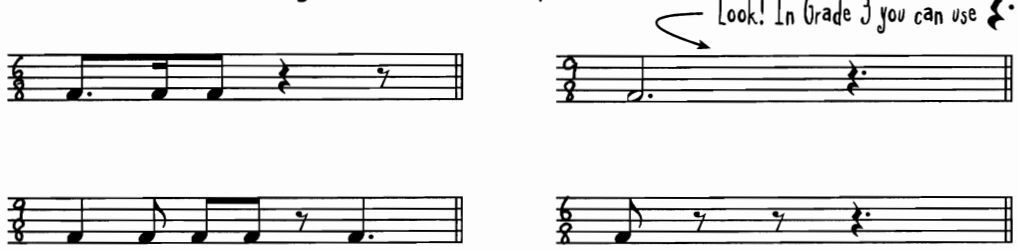
$\frac{9}{8}$ has 9 quaver pulses per bar, and the pulses are grouped into threes. So $\frac{9}{8}$ means '**three dotted crotchets per bar, compound triple**'. It's like an extension of $\frac{6}{8}$!

Time signature	Beats	Pulses
$\frac{6}{8}$	♩. ♩.	♫ ♫
$\frac{9}{8}$	♩. ♩. ♩.	♫ ♫ ♫

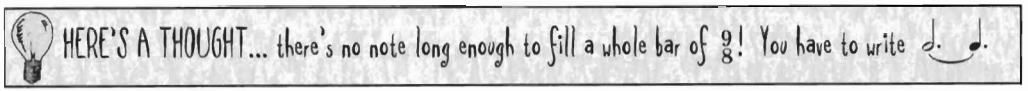
In Grade 3 we often see a dotted quaver/semiquaver pattern, like this: ♩.♬

Just imagine that ♩.♬ is a variation of ♫ - it's worth one dotted crotchet beat!

Write the correct time signature for these rhythms:



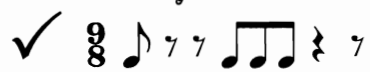
Look! In Grade 3 you can use 𝄽.



The grouping rules for $\frac{9}{8}$ are the same as $\frac{6}{8}$. Within each dotted crotchet beat, it's OK to group the first two quaver pulses, but not the second two.

Wrong

Right!



Complete these bars using rests. You can use 𝄽. instead of 𝄾 𝄾 if you want to!

The Duplet

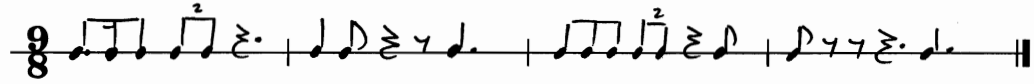
A duplet looks like this  or like this  and is equal to three quavers, or one dotted crotchet beat. For instance:

The definition of a duplet is:

'**Two notes played in the time of three notes of equal value**' (learn this!)

Fill these bars with duplets (don't forget the number '2')

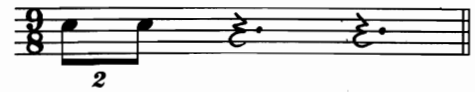
Compose 4 bars of rhythm here in $\frac{9}{8}$. Use some dotted rhythms and at least one duplet. Remember you can use 𝄽. instead of 𝄾 𝄾 if you want to! (But only in compound time!)



DID YOU KNOW... Duplets are mostly found in compound time signatures – $\frac{6}{8}$ and $\frac{9}{8}$. But it is also possible to have a duplet in $\frac{3}{8}$, and it would fill up the entire bar!

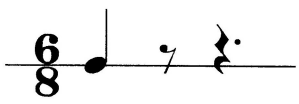
Add time signatures and the missing bar lines to these melodies.

Complete this bar with rests:

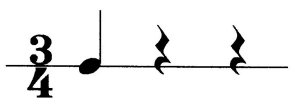


Rests in Compound Time

Like notes, rests must also be grouped to show dotted crotchet beats in compound time. Look at the difference between $\frac{6}{8}$ and $\frac{3}{4}$, when both bars start with crotchets:



Dotted crotchet rest shows grouping in threes



Crotchet rests show grouping in twos

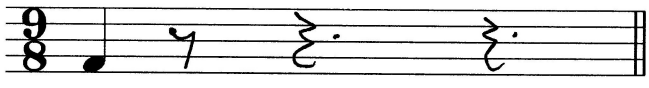
In compound time, a dotted crotchet's worth of silence can be written two ways:

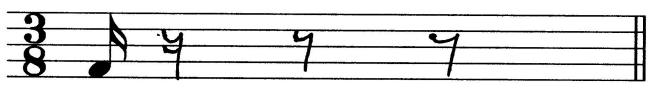
It should not be written like this  and NEVER like this 

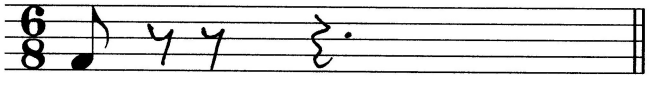
As discussed back on page 38, a crotchet rest may NOT occur on the 2nd of three quaver beats. For example, it is not ok to write  ! The crotchet rest must be split into 2 quavers like this:

When checking your grouping, it really helps if you draw dotted lines dividing the bars into dotted crotchet beats. Here is an example of grouping in $\frac{9}{8}$ time (first wrong, then right!):

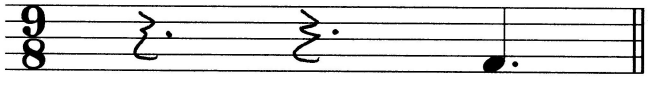
Even though $\frac{3}{8}$ is not technically a compound time signature, the same rules apply. Complete these bars with rests. Make sure your grouping shows compound time.

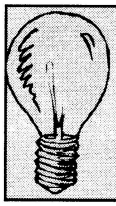






Add rests before the note!





HERE'S A THOUGHT... Time signatures with the number 6 or 9 on the top are COMPOUND. Time signatures with 2, 3, or 4 on the top are SIMPLE!

Fix These!

Rewrite these rhythms with the correct grouping in the 'Fix it Up' column. The sound of the rhythms must not change, so be careful with the order of notes and rests!

Wrong ✕	Why is it wrong?	Fix it up! ✓
	Crotchet rests show wrong grouping of quaver pulses		Quaver grouping does not show the minim beats		𝄾 must be followed by 𝅘𝅥𝅯	
	Single quaver must be followed by quaver rests		Can't group 2nd and 3rd minim beats together	
	Can't group semiquavers over beats 2 and 3		𝄾 must be followed by 𝅘𝅥𝅯𝅘𝅥𝅯		Quaver rest must be followed by single quaver		Quaver grouping does not show the minim beats		Quavers must be in 3s; wrong grouping of rests	
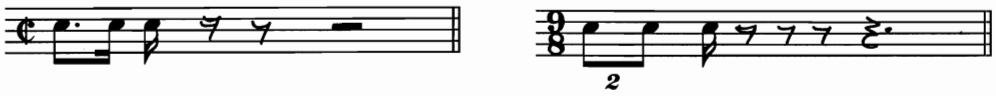
Rhythmic Revision

1. Complete these bars with rests in the correct order.



2. Add a time signature to this rhythm:

3. At each place marked with an arrow, write one note to complete the bar.

4. Complete these bars as directed.

3 notes and 1 rest 2 notes 4 notes and 2 rests

5. Write a suitable time signature for compound triple time. 9/8

6. How many semiquavers are in a dotted semibreve? (Warning: it is not ok to simply answer "lots")

24

7. Write a rest to fill this bar with silence:

8. Fill this bar with a single sound (hint: you'll need to use a tie):

9. Write the correct time signature for these melodies.

10. At each place marked with an arrow, add one rest to complete the bar.

11. Circle the time signatures in which we would find a minim rest.

$\frac{2}{4}$ $\frac{3}{4}$ $\frac{4}{4}$ $\frac{C}{}$ $\frac{6}{8}$ $\frac{3}{8}$ $\frac{2}{2}$ $\frac{3}{2}$ $\frac{9}{8}$ $\frac{¢}{}$

12. Fun research: Find out the name for notes with 3 tails () and four tails () !

Extremely Important Test

1. Name the following **minor** key signatures and scale degrees (e.g. tonic, mediant etc.) /8

Key: C minor | A minor | F sharp minor | E minor

Degree: mediant | leading note | dominant | supertonic

2. Add a time signature and the missing bar lines to this melody. /5

3. Name the key of this cadence and state whether it is perfect or imperfect. /2

Key: D major

Cadence: Imperfect

4. Write these triads with key signatures: /9

D minor
dominant (V)
first inversion

E major
subdominant (IV)
root position

B flat major
tonic (I)
first inversion

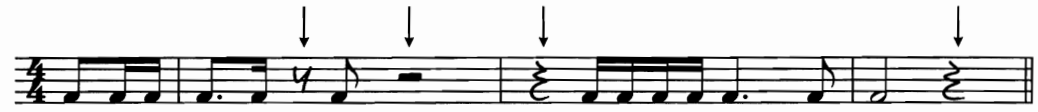
5. Tricky maths question: how many 𝅗𝅥. would there be in 𝅝. ? 4 /1

6. Write the following cadences. Use the rhythm values shown. /10

E minor
perfect cadence

B flat major
imperfect cadence (IV-V)

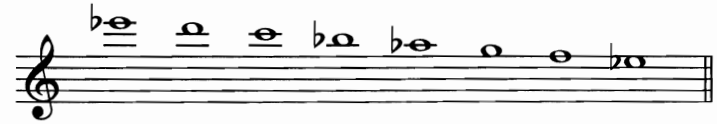
7. At each place marked with an arrow, add a **rest** to suit the timing of the bar. /4



8. Name two compound time signatures. /2

$\frac{6}{8}$ and $\frac{9}{8}$

9. Name this scale: /1



E flat major

10. Name these intervals by number and quality. /8

perfect 4th | major 7th | major 2nd | minor 6th | major 3rd

Total: /50

Inventing a Rhythm

You probably remember from Grade 2 that the first thing you should do when setting words to a rhythm is mark the accents with upright lines. Do this now.

I | climbed the | stairs and | entered the | room
Which | lay so | clean and | bare

Now you need to decide on a time signature. Most poetry flows along nicely in $\frac{6}{8}$ or $\frac{3}{4}$. (You might choose $\frac{2}{4}$ or $\frac{4}{4}$ if, for instance, the couplet is about a marching band!)

Next you must compose a rhythm to suit the words. Use the guidelines set out below:

For rhythms in $\frac{2}{4}$, $\frac{3}{4}$ and $\frac{3}{8}$, each accent in the couplet represents one bar

	1 syllable per bar	2 syllables per bar	3 syllables per bar
$\frac{2}{4}$			$\frac{3}{4}$			
$\frac{3}{8}$			

For rhythms in $\frac{4}{4}$, $\mathbf{C}$ or $\frac{6}{8}$, each accent in the couplet represents half a bar

	1 syllable per half bar	2 syllables per half bar	3 syllables per half bar
$\frac{4}{4}$ or $\mathbf{C}$			$\frac{6}{8}$			

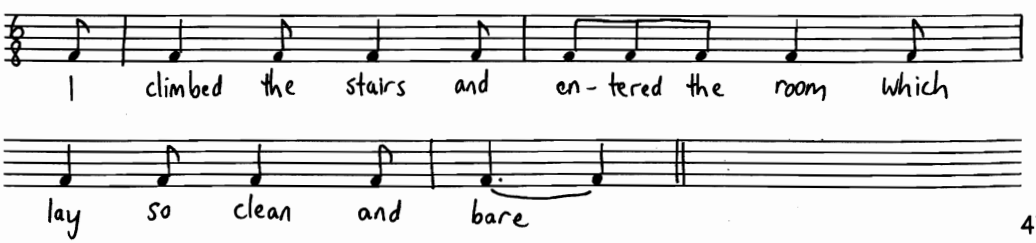
Write your rhythm on the staves below, with the words written neatly under the notes. Remember to hyphenate words with more than one syllable, and write the time signature on the first line only!



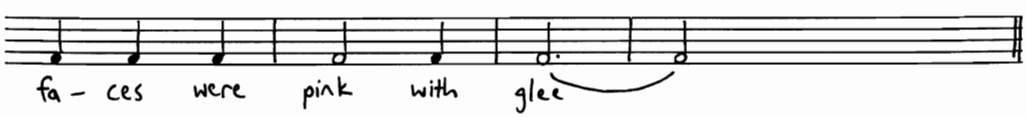
Top Tips for Ripper Rhythms

- Mark the accents first and treat the upright lines as bar lines
- In $\frac{2}{4}$, $\frac{3}{4}$ and $\frac{3}{8}$, each accent in the couplet represents one bar
- In $\frac{4}{4}$ and $\frac{6}{8}$, each accent in the couplet represents HALF a bar
- If you have only 7 bars, remember to add an 8th bar and tie the last note over
- If there is an anacrusis, make sure you adjust the last bar

Set the following couplets to rhythms.

|Sing and |let the |wide world |hear,
Thy |melody so |sweet and |clear.

The |children |danced, and |jumped, and |ran,
Their |faces were |pink with |glee.



Go to **www.blitzbooks.com.au** and download the 'Creative Couplets' page as well as some free manuscript. Write rhythms to all seven couplets in the time signatures of your choice.

Adding Variety

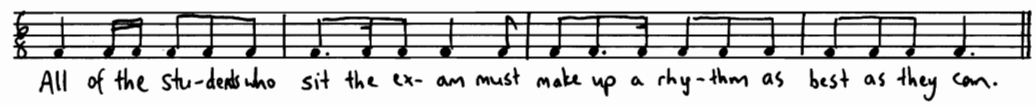
Check out this rhythm:

It is perfectly correct, but it's BORING! There are some great ways to vary  .

You could have  or  or even  !

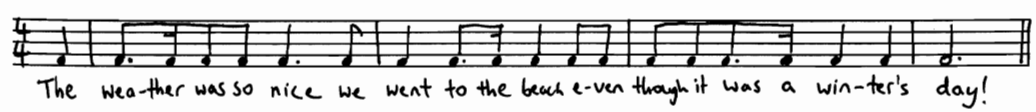
The trick is to know which bits to change. Make sure that the variation suits the words - clap them and say them out loud. Don't change ALL of the rhythms - the idea is to have variety!

Now re-write the above rhythm and words, making it much more interesting:



Here is an example in $\frac{4}{4}$:

You could vary this by changing some of the patterns to and some of the  patterns to  Rewrite the rhythm and words here and make it interesting!



Go to **www.blitzbooks.com.au** for more practise in varying your rhythms!

Stretching Syllables (Or: Adding Even More Interest)

Sometimes a rhythm can be a little boring, but in a way that is hard to fix, e.g.

The best way to vary this rhythm is to **add** some notes! But to do this correctly you must remember this rule:

If two or more notes share one syllable, the notes **MUST** have a slur!
(It would be better not to add the notes than to forget the slur!)

e.g.  can become or  or  or even 

Pick some interesting syllables in the rhythm above and add some quavers - with slurs!

DID YOU KNOW... a slur connecting two or more notes that share a syllable is called a 'melisma'. There are lots of melismas to be found in your folk song book – have a look!

Make these rhythms more interesting with some added notes and melismas:

Go to **www.blitzbooks.com.au** and download the 'Creative Couplets' page again. This time write really INTERESTING rhythms, using different time signatures to the ones you used last time!

Short Revision Test

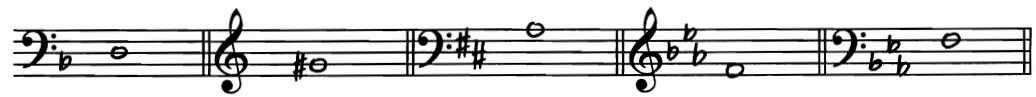
1. Write a suitable rhythm to the following couplet. /6

In the exam we will get a verse
So this is a very good way to rehearse

2. Write the inversions of these intervals and name each inversion. /6

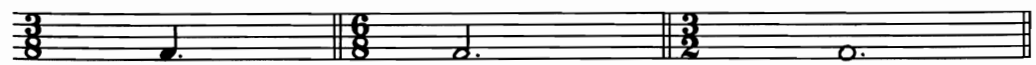
minor 3rd major 6th perfect 8ve minor 2nd

3. Write the following key signatures and the named scale degree for each. /10



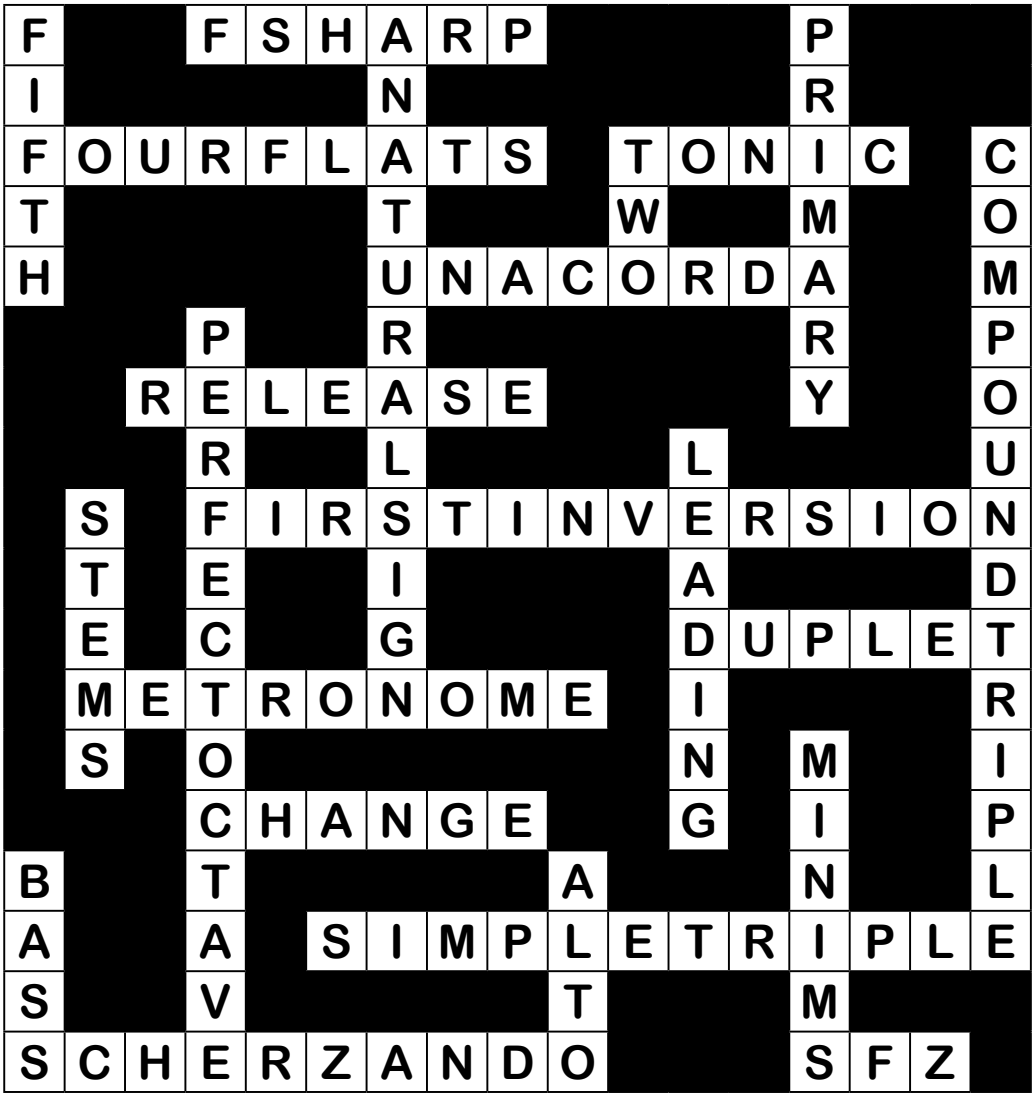
F major	A minor	D major	C minor	E flat major
submediant	leading note	dominant	subdominant	supertonic

4. In each of these bars, write **one note** to fill the whole bar. /3



Total: /25

Crossword Answers M3



ACROSS

2. Leading note of G minor (1,5)
5. F minor has this key signature (4,5)
6. Chord I is known as the _____ triad (5)
8. Italian term meaning to use the soft pedal (3,5)
(see page 58 for this, as well as clues 10, 15, 21 and 22)
10. 'Tre Corde' or T.C. means to _____ the soft pedal (7)
13. Position of a triad when the root is on the top (5,9)
14. Something you would never find in simple time (7)
(hint: remember that quavers are SUPPOSED to be in twos)
15. Johann Maelzel invented this in 1815 (9)
17. Do this to some rhythms in your rhythmic invention (hint: so that it's not all the same) (6)
20. $\frac{3}{2}$, $\frac{3}{4}$ and $\frac{3}{8}$ are all examples of this type of time (6,6)
21. Italian word for 'playfully' or 'jokingly' (10)
22. Abbreviated version of 'Sforzando' (3)

DOWN

1. The dominant is also known as the _____ degree of the scale (5)
3. You don't always use a sharp sign to raise the 7th, sometimes you use... (1,7,4)
4. Chords I, IV and V are known as the 3 _____ triads (7)
6. Number of minims in a bar of cut common time (3)
7. Type of time that has three dotted crotchet beats per bar (8,6)
9. The inversion of a perfect unison (7,6)
11. Raise this note in cadences and triads as well as scales in minor keys (7)
12. The rules for the direction of these change in SATB writing (5)
16. You are often asked to write cadences using these note values because of clue no. 12 (6)
18. Vocal range with highest note middle C (4)
19. The second highest female voice (4)

Melody Writing

In the exam you will be asked to write a melody to a given rhythm. Even if you've never composed a melody before, you can make it sound good by following a few guidelines. Let's start by looking at this melody in C major:

Things to Notice

- ★ The melody is based on chords - one chord per bar.
- ★ There are two phrases: the first phrase ends on chord V, and the second phrase ends on chord I.
- ★ The chord I bars mostly contain the notes C, E and G.
- ★ The chord V bars mostly contain the notes G, B and D.

Put a circle around C, E and G in the chord I bars, and circle G, B, and D in the chord V bars. We'll call these circled notes 'chord notes', or 'chord jumps'.

Passing Notes

As you can see, there are some notes in each bar (the notes without a circle!) that do not belong to the chord. These are called 'passing notes'. Passing notes are GOOD - they give the melody interest and variety. There are never any leaps to or from a passing note; they must literally 'pass' in a row between the chord notes, like stepping stones. Passing notes should **always** fall on a weak beat.

Here is a melody with only chord notes. Play or sing it through - you'll find it's a bit boring! Make it more exciting by adding a few passing notes; you'll need to turn some of the crotchets into quavers to do this. (And remember, you may not leap to or from a passing note!)

Here's a rhythm for you to write your own melody in G major. Clap through the rhythm and decide on the phrasing. Mark two phrases with slurs.

Now write a melody below, following these steps:

1. Use one chord per bar for now. The best chord sequence is I V V I.
2. Work out which notes are in chords I and V in G major. Write these note names above the bars so that you know which notes you'll be using the most.
3. Compose your melody using a mixture of chord notes and passing notes. Use chord jumps for the longer note values, and use passing notes (i.e. scale movement) for the shorter note values.
4. Whenever you use the leading note, it MUST go up to the tonic, unless it is part of a downward scale passage.
5. Make sure your melody ends on the tonic, and mark the phrasing.

The Anacrusis

Sometimes the given rhythm will have an anacrusis. The best note to use is the dominant (scale degree no. 5). Try a melody in F major to this rhythm (follow the steps above):

Circle the chord notes in your melodies. They should occur on the beat. The uncircled notes are passing notes; make sure you haven't jumped to or from a passing note!

More Melody Hints (there are heaps)

- The first and last bars must be based on chord I. The melody may begin on any note of chord I, but **the last note must be the tonic.**
- If there is an anacrusis, use notes from chord V. For a 2-note anacrusis, use scale degrees 5-4 (leading to the mediant) or 3-2 (leading to the tonic).
- The second last bar must be based on chord V. This means the melody will end with chords V-I, a perfect cadence.
- It's best to reach chord V at the end of the first phrase.
- Never leap to or from the leading note, unless it is from another note of chord V.
- The leading note must go **up** to the tonic. It's OK if it leaps to another note of chord V first... but even so, it must **eventually** go up to the tonic, e.g.

This is incorrect – the leading note has not resolved UP to the tonic

This is the correct tonic – the leading note has resolved UP!

- Always use chord notes on the strong and medium beats of the bar.
- Use passing notes to create scale passages for faster rhythms.
- **Never leap to or from a passing note.**
- Avoid repeated notes - they hold up the flow of the melody.
- A leap of a 6th or 8ve can sound really good. The notes immediately following the leap should move in the **opposite** direction to the leap. Aim for just one or two large leaps in your melody - the rest should move by step or in small leaps.
- The melody should be comfortable to sing. Make sure it covers a range of at least one octave - don't get bogged down in the same five or six notes.
- Try using chord IV (how adventurous!) in the first half of bar 2 or 3, leading to chord V.
- Try to sing though your melodies, or play them on your instrument. This way you'll get really good at hearing them in your head!

Compose melodies to the following rhythms, in the keys specified. Remember to decide on the phrasing and mark it in. Revise all your melody writing hints before you start!

1. G major

2. B♭ major

3. D major

4. F major

5. C major

Go to www.blitzbooks.com.au for more worksheets on melody writing!

Yet Another Test

1. Complete this perfect cadence, and name the key. /5

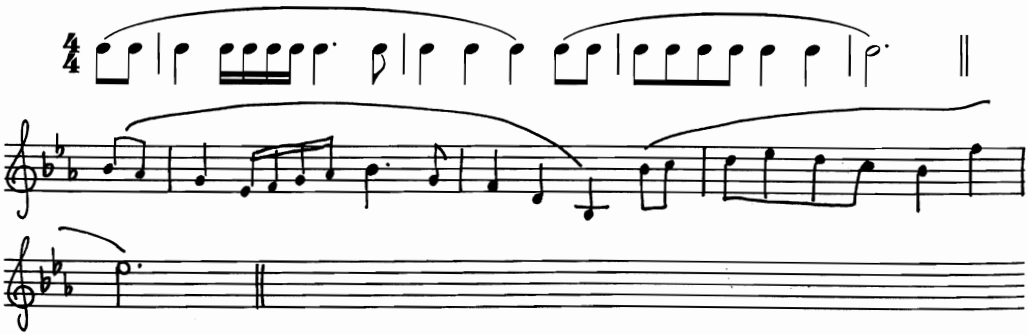
Key: G minor

2. Write a rhythmic pattern to this couplet in the time signature of your choice. Write the words neatly under the notes. /8

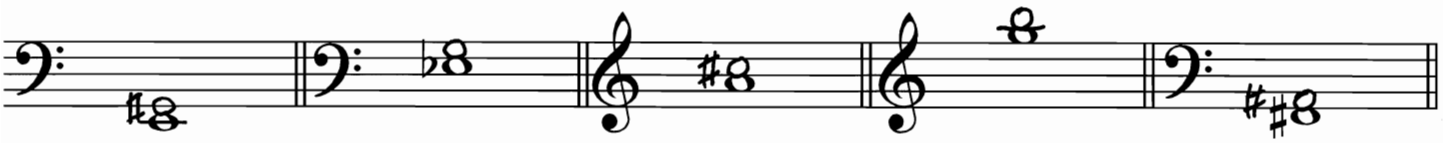
I wish this test was not so long
'Cos I just don't want to get things wrong

3. Write the range of the tenor voice here: /2

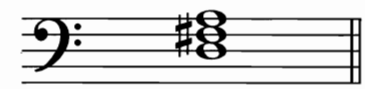
4. Write a melody in E flat major to this rhythm. Mark the phrasing. /8



5. Write an interval of a major 3rd above each of these tonics. /5



6. Name the key of these **subdominant** triads. (The accidentals are clues!) /4

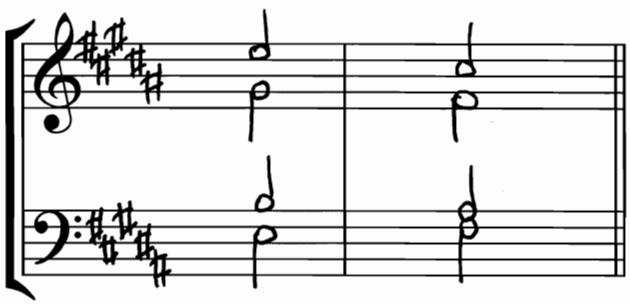


A major

A♭ major

7. Write these two types of imperfect cadences with key signatures. Use minims. /10

C minor
(I - V)



B major
(IV - V)

8. Write the major scale with the key signature of four flats: /8

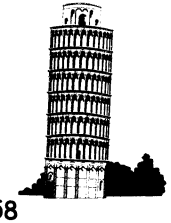
- ★ use treble clef
- ★ use accidentals - not the key signature
- ★ use crotchets
- ★ write two octaves going down
- ★ mark the tones
- ★ circle the mediant note in each octave
- ★ complete the scale with a double bar line

Total: /50

Terms and Signs

Here is the list of Italian terms to learn for Grade 3. The terms listed below are **in addition to** the terms for Grades 1 and 2, which you can download from **www.blitzbooks.com.au**. Also try the BlitzBook of Musicianship Games!

Adagio	-	slowly
Presto	-	very fast
Con grazia	-	with grace
Con moto	-	with movement
Dolce	-	soft and sweet; sweetly
Ben marcato	-	well marked
Una corda (U.C.)	-	(one string) play with the soft pedal
Tre corde (T.C.)	-	(3 strings) release the soft pedal
Cantabile	-	in a singing style
Leggiero	-	lightly
*Sforzando (**sfz** or **sf**)*	-	a strong accent
Scherzando	-	playfully
Dal segno (D.S.)	-	from the sign
Da capo al fine (D.C. al fine)	-	from the beginning until 'fine'
Tenuto (ten.)	-	'held'; hold note for its full value
8va ('ottava')	-	play one octave higher than written
M.M.	-	Maelzel's metronome (metronome marking)



Quick Quiz

This quiz includes questions on terms and signs from Grades 1 and 2 as well as Grade 3. Make sure you go to **www.blitzbooks.com.au** for a complete list of terms and signs!

1. Explain '8va' Ottava: play one 8ve higher than written

2. Write the Italian **abbreviation** that means to play with the soft pedal: U.C

3. The definition of a duplet is two notes played in the time of three notes of equal value

4. What does 'tenuto' mean? held; hold the note for its full value

5. Write five Italian terms for tempo in order from slowest to fastest:

adagio	andante	moderato	allegro	presto
slowly	at an easy walking pace	moderately fast	lively and fast	very fast

6. Explain M.M ♩ = 60 Maelzel's Metronome – set beat at 60 crotchet beats per minute

7. Give the Italian and English meaning of *sfz* : Sforzando: with a strong accent

8. Add a mezzo staccato sign to this note: 

9. How many dotted crotchets are there in a dotted semibreve? 4

10. Translate the Italian words in this sentence: The boy walked *scherzando* (playfully) up to the dog and patted it *leggiero* (lightly), but the dog barked *fortissimo* (very loud) so he ran away *presto* (very fast)!

11. True or false: Writing *'8va'* underneath a passage makes it an octave lower. False

Modulating Melodies

Quick Revision of Grade 2 Stuff:

- ★ A melody beginning in one key may finish in another. This means it has modulated.
- ★ To figure out the opening key, look at the **key signature** and the **first few notes**.
- ★ To figure out the modulation, look for **accidentals** and check the **last note**.
- ★ The melody will modulate to one of three related keys:

Modulates to	Last note	New key
DOMINANT	scale degree no. 5	one sharp more/one flat less
SUBDOMINANT	scale degree no. 4	one flat more/one sharp less
RELATIVE MAJOR/MINOR	scale degree no. 3/6	same key signature, change of tonality

HOT TIP: Minor melodies contain an accidental for the raised 7th. If the accidental disappears, it means the melody has modulated to the relative major!

This melody has modulated from D major to A major.

It has finished in the (dominant)/subdominant /relative minor (circle correct answer)

This melody has modulated from F minor to A flat major

It has finished in the dominant /subdominant /(relative major) (circle correct answer)

Groovy Guidelines for Key Relationships

- ★ The dominant key of a **major** key remains MAJOR
- ★ The subdominant key of a **major** key remains MAJOR
- ★ Same for **minor** keys: dominant and subdominant are MINOR
- ★ Only the relative major/minor key changes tonality!

In the following melodies, name the original (starting) key, the key it modulates to, and the 'relationship' to the original (e.g. dominant, subdominant or relative major/minor).

Original key: A minor New key: C major Relationship: relative major

Original key: B flat major New key: F major Relationship: Dominant

Original key: C major New key: F major Relationship: Subdominant

Here's a trickier one...the modulation is in the middle!

Original key: D major The modulation occurs in bars 4 and 5

Key of modulation: B minor Relationship to original key: Relative minor

The Sequence

The definition of a sequence is 'a pattern of notes repeated at a higher or lower pitch'. All the rhythms and intervals are exactly the same, only the notes are different.

Look at the sequence in this melody:

The first three bars have the same rhythm and the same intervals, but each bar begins one note higher. Which bar breaks the sequence by not following the pattern? Bar 4

Here is another melody with a sequence:

Which two bars have the same rhythm? 2 & 3

Do they also have the same intervals (shape)? yes

Then this is a sequence! Put square brackets like this ⌜ ⌝ ⌜ ⌝ over bars 2 and 3 to 'mark' the sequence (one bracket for each pattern).

A sequence must have two or more **identical** patterns. Look at bars 5 and 6 of this melody. The rhythm is the same, but the intervals are different, so this is NOT a sequence:

Now look at bars 1 and 3 of the melody above. They DO have the same rhythm and the same intervals, but they are not consecutive bars so this is NOT a sequence!

REMEMBER: To make a 'sequence', two or more patterns must have identical rhythm and intervals, AND they must be consecutive. If the patterns are not next to each other, it's not a sequence!

Sequences are not always easy to see. Let's try spotting the sequences in this melody:

Bars 1 and 2 are completely different; Bars 1, 3 and 5 are the same in rhythm and intervals but are not next to each other. Maybe you are thinking: 'There is no sequence here!' But let's look again...

Look at bars 1 and 2, now look at bars 3 and 4. Can you see the similarities? So the pattern in this sequence is 2 bars long. Mark the sequence with square brackets.

Look at bar 5 of the melody above. It seems a third pattern is starting – but bar 6 is different! You must always check that the patterns are exactly the same length, otherwise they cannot be part of the sequence.

Sometimes the repeating patterns are a lot higher or lower than the original pattern. Mark the sequence here with square brackets.:

It is possible to have an entire sequence in one bar! Mark the sequence here:

Sometimes the patterns have an 'anacrusis'. You'll find that the brackets for this sequence go over the bar lines!

Timed Test III

Time:

Yet again, time yourself doing this quiz. Do it as fast as you can, but remember your teacher will **ADD ON 10 SECONDS** for every mistake. Start the clock!

1. Write three time signatures for simple triple time: $\frac{3}{8}$, $\frac{3}{4}$ and $\frac{3}{2}$

2. Name this interval:  perfect 8ve

3. How many bread rolls are there in a baker's dozen? 13 (hee hee)

4. Complete the following bar using at least one duplet:

5. Name the key of this tonic triad:  E flat major

6. In perfect cadences and melody writing, the leading note must go to the tonic

7. Write chord IV of E major in first inversion with a key signature:

8. Mark the sequence in this melody with square brackets.

STOP THE CLOCK - FILL IN YOUR TIME AT THE TOP!

☐ I made no mistakes! I keep my time of _____ !

☐ I made ____ mistakes. My new time is _____

Form

Melodies usually have a certain structure or form. The two most common forms are:

BINARY FORM = 2 sections - part 'A' followed by part 'B' (AB)

'Binary Form' has two sections - think of Bicycle, Binoculars, etc. A melody in Binary form will often be 8 or 16 bars long.

TERNARY FORM = 3 sections - part 'A' followed by part 'B', then part 'A' repeated (ABA)

'Ternary' begins with 'T' for Three sections, Triangle, Tricycle etc. A melody in Ternary form will often be 12 or 24 bars long.

HOT TIP: A piece of music should have sections that balance each other. There will often be 4 bars per section in a melody.

Here is a very well known piece - Twinkle Twinkle Little Star. It is in ternary form - ABA. The letters are marked on the tune.

1. How many bars are there in total? 12
2. How many bars per section? 4
3. What do you notice about the two A sections? They are the same

Here it is again, this time shown in a different format. It now looks as though it's in Binary form... but the 'D.C. al Fine' sign transforms it into ternary!

Sometimes a melody is in ternary form but the two 'A' sections are not identical. As you can see, the last four bars of 'Twinkle' below have some added notes and a different rhythm, but the shape of the melody is basically the same! See if you can mark the sections with the letters A, B etc:

It looks even trickier over two lines instead of three. Mark the sections in this version:

Becoming a Form Detective

It's quite easy to hear the form of a piece of music when it's played, but when it's printed on the page, you have to be able to SEE the form!

Clues to look for when deciding the form of a melody:

- Even numbers of bars per section (usually 4, sometimes 2, occasionally 8!)
- Rests or long notes that could mean the end of section 'A'
- Differences in shape and rhythm between the sections
- Similarities between the first few and last few bars, meaning 'A' has returned

Name the form of each of these melodies, and mark the sections using 'A' and 'B'. (When marking 'A' at the beginning of a melody, always put it over the very first note, even if that note is an anacrusis!)

Form: Ternary

Form: Ternary

Form: Binary

More Form Clues

If section 'A' has an anacrusis, the other sections will probably have one too

'D.C. al fine' or D.S. al fine' will transform a binary melody into a ternary melody. However, a repeat sign does NOT change the form of a melody!

Name the form of each of these melodies, and mark the sections using 'A' and 'B'.

Form: Ternary

Form: Binary

Form: Ternary

Form and Other Stuff

Study this melody and answer the questions below.

i) At what speed is the above melody to be played? Very fast

ii) In what style should the melody be played? Playfully

iii) Add an accent sign to the first note in bar 1.

iv) Add mezzo staccato signs to the quavers in bar 7.

v) Add a sign to pause on the first note of bar 8.

vi) Mark any sequences with square brackets like this: ⌜ ⌝ ⌜ ⌝

vii) What form is this melody? Ternary Mark each section with the letters A,B, etc.

And now here's another one...

i) What is the form of the melody? Binary Mark the sections with A, B, etc.

ii) Add an Italian word to show the melody should be played in a singing style.

iii) Give the full name and meaning of the Italian abbreviation in bar 7. Rallentando – gradually becoming slower

iv) This melody begins in D major, then modulates in bars 3 and 4 to the key of A major. The relationship of this key to the original key is the dominant.

Yes, that's right, there are two more melodies on this page! (lucky you)

(i) What key is this melody in? G minor

(ii) It modulates in bar 3 to the key of B flat major. Name the relationship of this key to the original key. Relative major

(iii) Name the form of the melody Ternary Mark the sections using A, B, etc.

(iv) Add the missing time signature.

(v) Add a sign to show that bar 7 should be played an octave higher.

(vi) In bar 8 the melody returns to the key of G minor.

(vii) Add an Italian word at the beginning to indicate the melody is to be well marked.

(viii) Add a sign to show that the speed of the melody is 100 crotchets per minute.

(ix) Mark any sequences with square brackets like this ⌜ ⌝ ⌜ ⌝

DID YOU KNOW... Music sounds great in 4 or 8 bar phrases, but there are many tunes which have slightly uneven bars per section! Have a look through your folk song book for some excellent examples.

(i) Study the melody above. What form is it in? Binary Mark the sections using the letters A, B, etc.

(ii) Explain the time signature. Three quaver beats per bar, simple triple

(iii) Name the two keys featured in this melody. F sharp minor and A major

(iv) Name the device marked with square brackets. sequence

(v) Add an Italian term to show that the melody should be played sweetly.

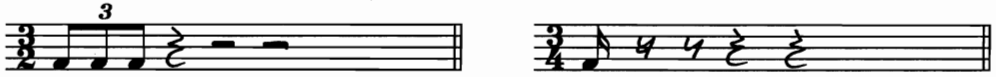
1. 'Dal segno' means 'from the Sign'
2. Italian for loud
3. $\frac{6}{8}$ and $\frac{9}{8}$ are both examples of this type of time
4. This note must always go to the tonic
5. Abbreviated term for 'with a strong accent'
6. Italian term meaning release the soft pedal
7. $\frac{3}{2}$, $\frac{3}{4}$ and $\frac{3}{8}$ are all examples of Simple triple time
8. Technical name for scale degree no. 3
9. This accidental is sometimes used instead of a sharp to raise the 7th
10. Johann Maelzel invented this in 1815
11. Previous name for the game of football (not essential Grade 3 knowledge)
12. Cadence involving the chords V-I
13. Female vocal range beginning on middle C
14. Chord V is also known as the dominant triad

Absolute Final Revision Test

1. Complete each bar with rests in the correct order. /4



2. Name the form of this melody and mark the sections with A, B etc. /4

Form: Ternary

3. Compose a balanced melody in A flat major to this rhythm. /8

4. Name these intervals by number and quality. /5

major 2nd | perfect 5th | minor 6th | minor 3rd | major 7th

5. Write the following cadences with a key signature. Use crotchets. /8

G major
imperfect cadence

C minor
perfect cadence

6. Write a suitable rhythmic pattern to these words. /6

I | will make | sure that I | do my | best
In the | 'Absolute | Final Re | vision | Test'

7. Name an ingredient found in chocolate cake: cocoa (ok this is not really revision) /1

8. For each of these intervals, write and name the inversion. /4

major 6th | perfect 4th

Total: /40

Test Paper... sort of

All theory books end with a test paper, but this one is DIFFERENT. It already has the answers in it (mostly wrong answers!) and your job is to be the teacher - you have to **mark** it.

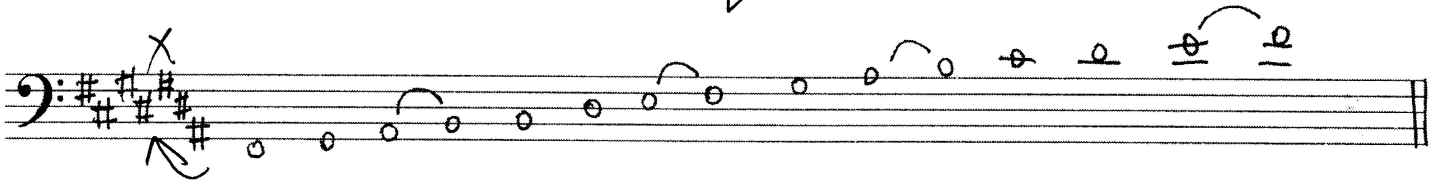
When you've found all the mistakes, go to www.blitzbooks.com.au and download the EXACT SAME PAPER - this time with no answers already in it. See if you can get 100%!

Question 1	KEYS AND SCALES	Total Marks 17	7

A. Write the scale of F sharp major.

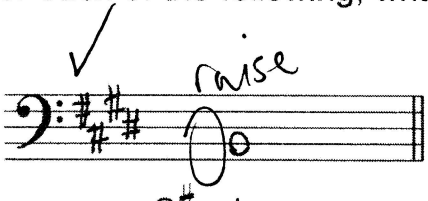
1/7

- Write the key signature. X
- Use crotchets. X
- Write two octaves descending. X
- Mark each tone with a slur. Semitones marked X
- Complete the scale with a double bar line. ✓



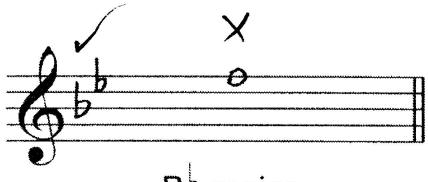
B. For each of the following, write the key signature and the named scale degree.

5/8

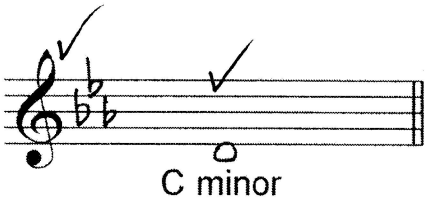


raise

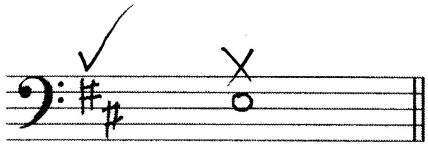
C♯ minor
leading note



B♭ major
subdominant



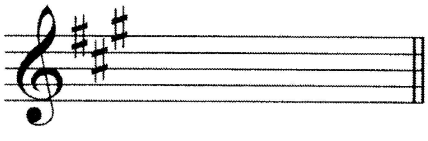
C minor
supertonic



B minor
submediant not subdominant

C. Name two keys that share this key signature.

1/2



i) A major ✓

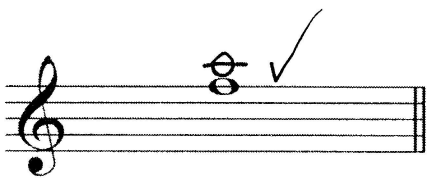
ii) F minor X F♯m

Question 2	INTERVALS	Total Marks 13	8

A. Write these intervals above the given tonic notes. 3/4

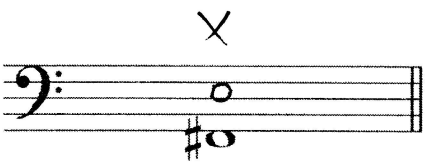
major 6th

perfect 5th



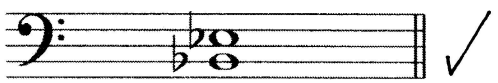
major 3rd

accidentals needed!

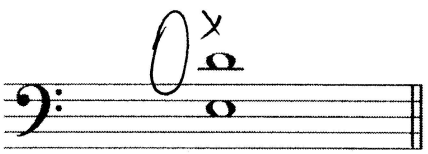


major 7th

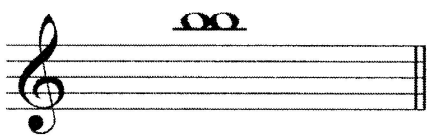
B. Name these intervals by number and quality 5/8



Perfect 4th



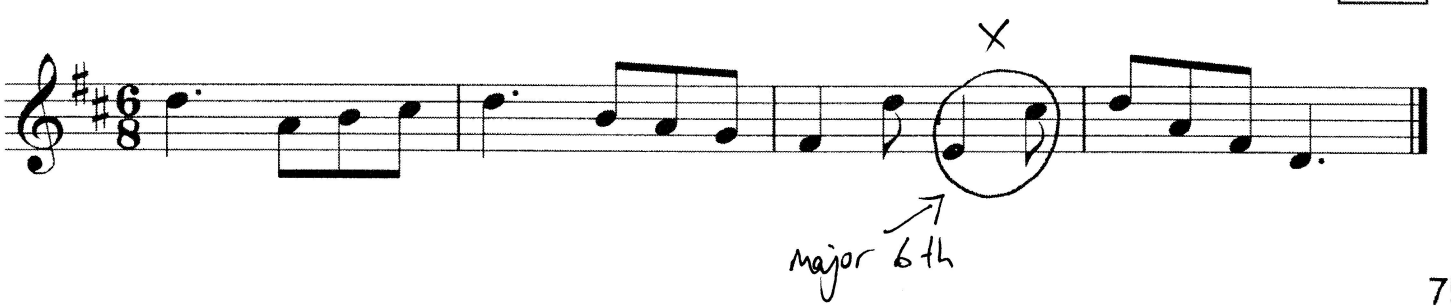
Major 7th
Minor



Perfect 1th
unison

Major 2nd

C. Circle an interval of a minor sixth between two consecutive notes in this melody. 0/1

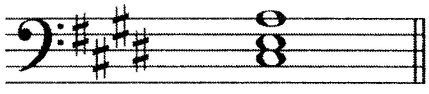


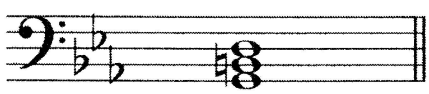
major 6th

Question 3	CHORDS AND CADENCES	Total Marks 23	11

For each of the following triads: 5/9

- name the key
- name the triad as the tonic (I), subdominant (IV) or dominant (V) of that key
- name the position as either root position or first inversion





Key	E major ✓	E♭ major X	B major ✓
Triad	VI X	III X	III X
Position	First inversion ✓	Root ✓	First inversion ✓

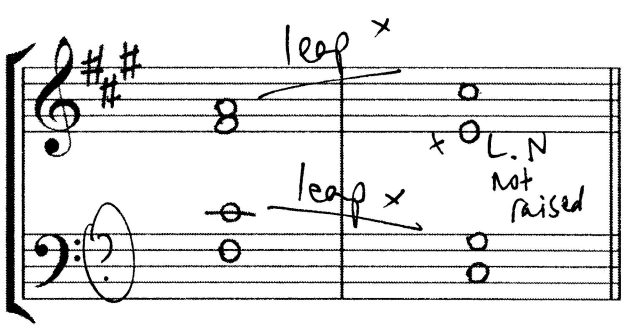
B. For each of the following, write the key signature and the named triad. 3/6

F minor
subdominant (IV) ✓
root position ✓

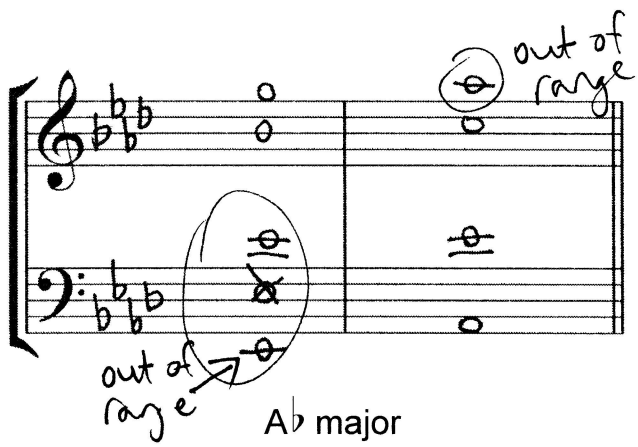
B major ✓
tonic (I) ✓
first inversion X

C. Write these cadences in four-part vocal style. 3/8

- Use root position chords
- Write the key signature
- Use semibreves.



F♯ minor
imperfect cadence

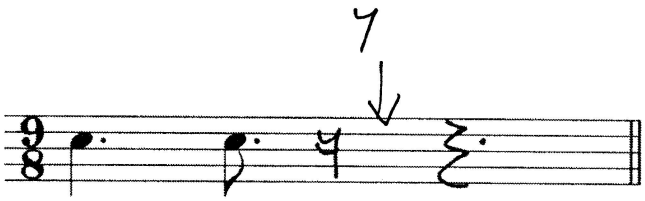


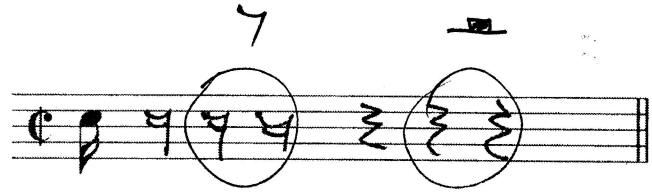
A♭ major
perfect cadence

Question 4	TIME and RHYTHM	Total Marks 12	4

A. Write the correct time signature for these one-bar rhythms. 2/4

B. Complete each bar with a rest or rests in the correct order. 0/2





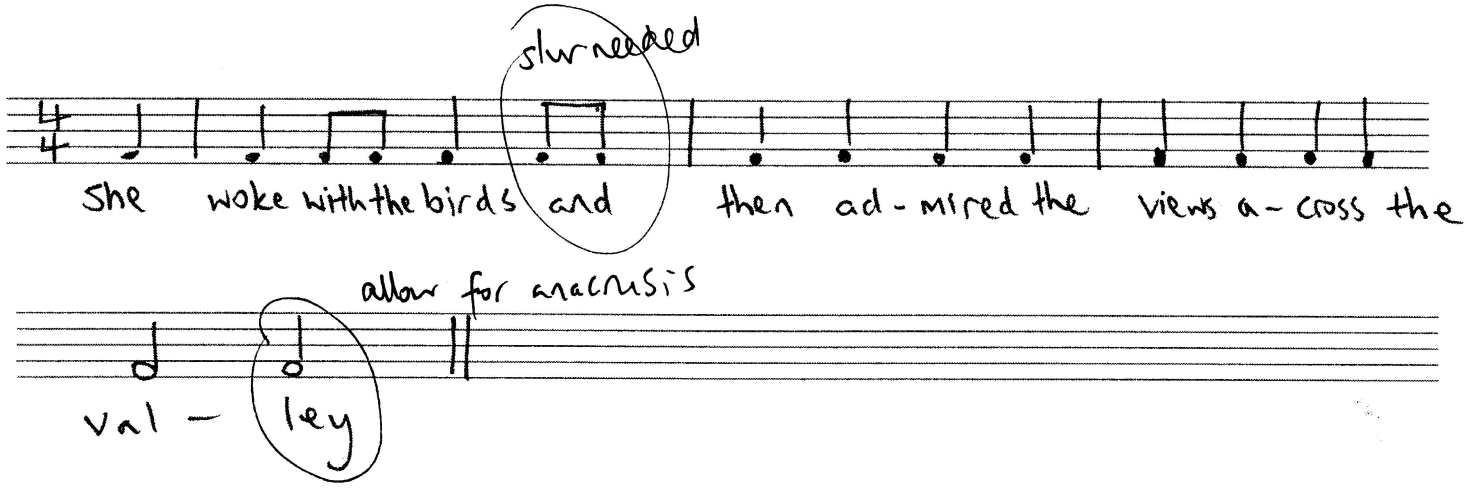
D. Place a tick in the appropriate columns to correctly describe each time signature. 2/6

	Simple	Compound	Duple	Triple	~~Quadruple~~ Single
$\frac{3}{8}$		✓ X			✓ X
$\frac{9}{8}$		✓ ✓		✓ ✓	
$\frac{3}{2}$		X ✓		✓ ✓	

Question 5	RHYTHMIC INVENTION	Total Marks 8	6

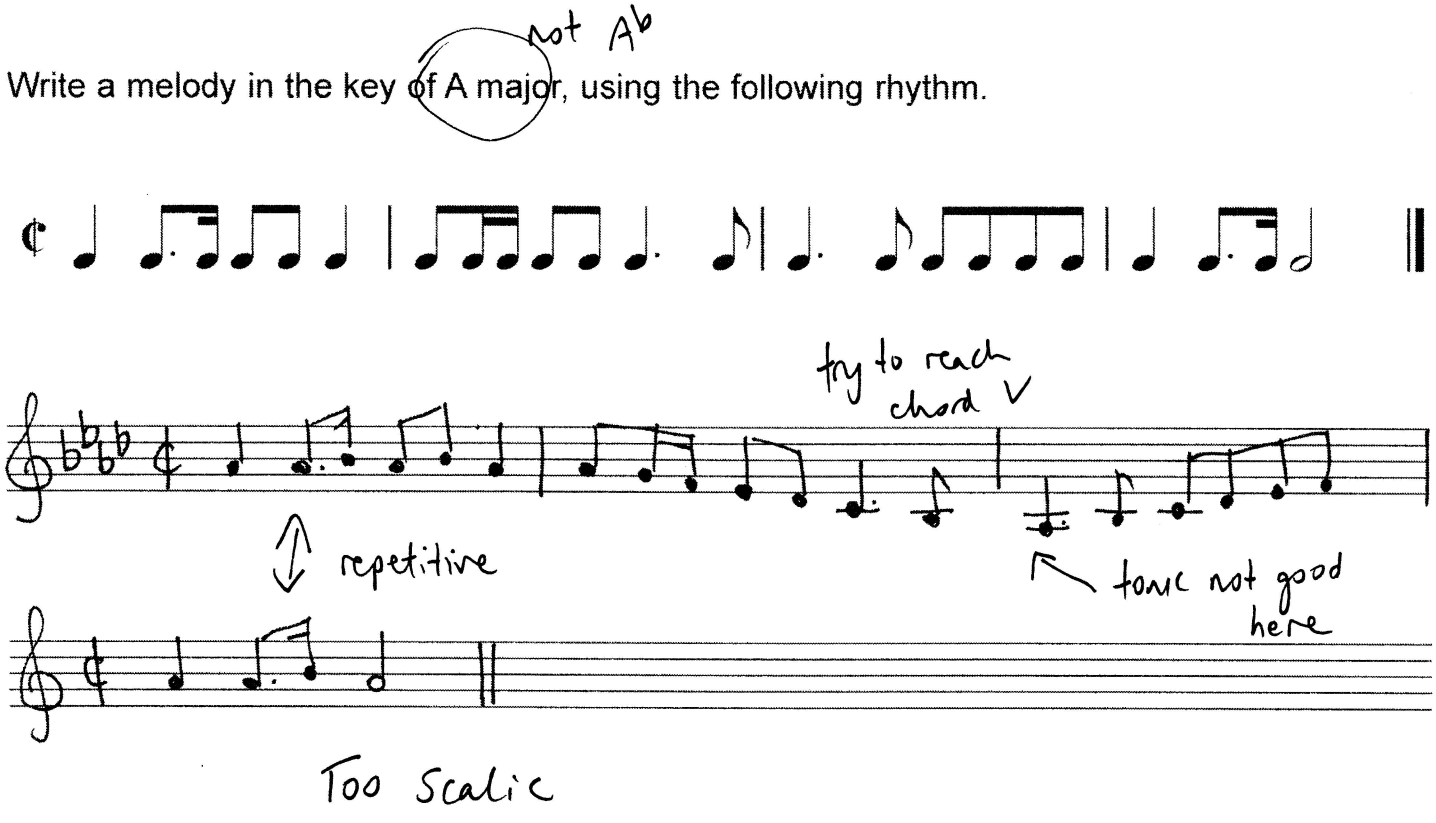
Write a rhythmic pattern to suit the words below.
Write the words clearly under the notes, and use hyphens for words of more than one syllable.

She woke with the birds, and then admired
The views across the valley.



Question 6	MELODY	Total Marks 8	3

Write a melody in the key of A major, using the following rhythm.



Question 7	GENERAL KNOWLEDGE	Total Marks 19	8

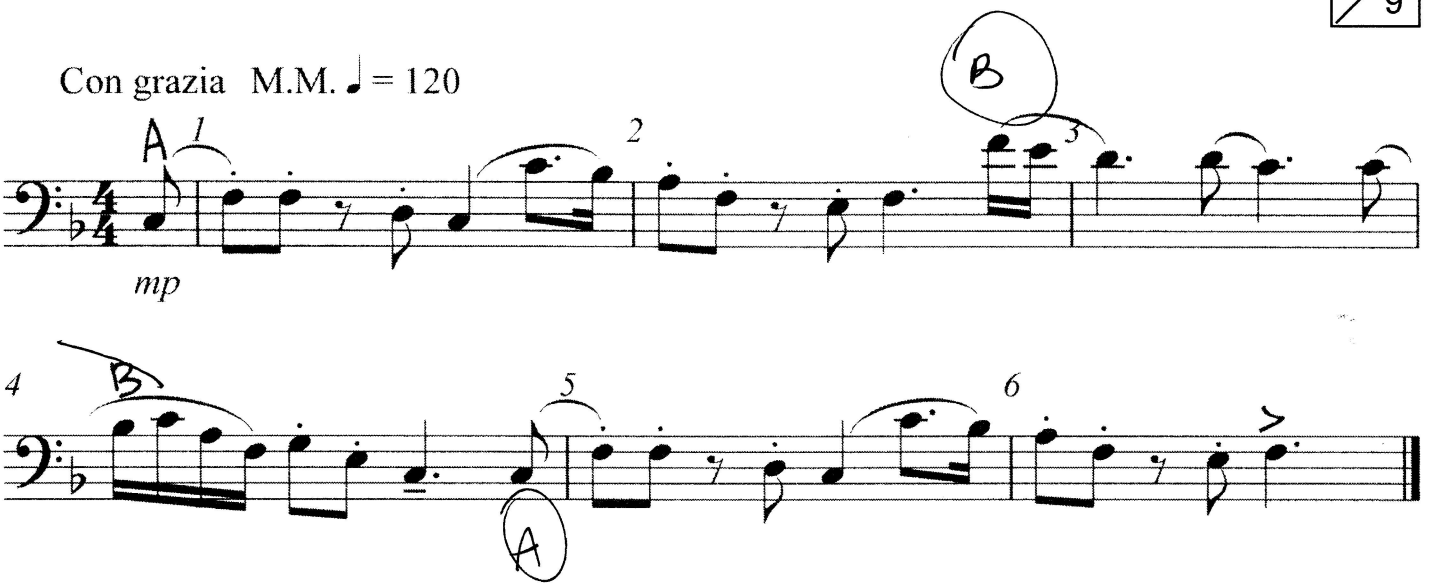
A. Give the English meaning of the following terms. 1½/3

i) *una corda* ..... one cord X

ii) *scherzando* ..... playfully ✓

iii) *piu mosso* ..... more (faster) speed ½

B. Study this melody and answer the questions that follow. 2½/9



i) Name the form of the melody. ..... Binary X

ii) Mark the main sections of the form with the letters AB or ABA. X

iii) What is meant by the sign M.M? ..... Metronome ~~X~~ ½ 'Maelzel'

iv) At what speed is this melody to be played? ..... ♩ = 120 meaning?

v) What is the English meaning of *con grazia*? ..... With congratulations X

vi) Explain the signs on the quavers in bar 2 ..... Dots meaning?

vii) Is there a sequence in bar 3? Yes or no? ..... Yes? Just 'yes' will do ✓

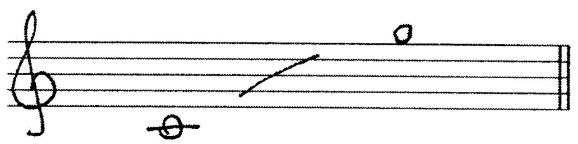
viii) What is meant by *ben marcato?* ..... Well marked ✓

ix) Add a tenuto sign to the last note. X

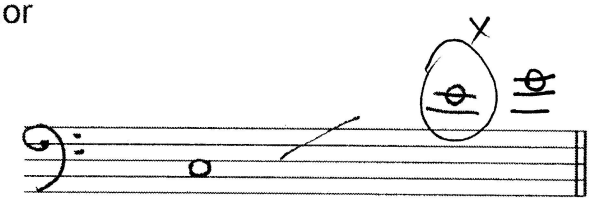
C. Write the ranges for each of these voices as used in normal choral writing, using the appropriate clef.

2/4

1) soprano



2) tenor



D. This melody modulates.

2/3

i) Name the original key ..... G minor ✓

ii) Name the new key ..... Bb major ✓

iii) Name the relationship of the new key to the original key. ..... mediant X

Mark 47/100
